Mine the Gap for Mathematical Understanding, Grades K-2 John SanGiovanni, 2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give, one part how we diagnose what we see, and one part what we do with what we find. Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students' responses tell us what we need to know about next best steps. In this remarkable book John SanGiovanni helps us value our young learners' misconceptions and incomplete understandings as much as their correct ones because it's the gap in their understanding today that holds the secrets to planning tomorrow's best teaching. SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K-2 mathematics including counting and representing numbers, number relationships and comparison, addition and subtraction within 100 and 1000, money and time, and multiplication and division. The tasks are all downloadable so you can use or modify them for instruction and assessment. Each big idea offers a starting task followed by what makes it a high quality task, what you might anticipate before students work with the task, 4 student examples of the completed task showcasing a distinct gap, commentary on what precisely counts for mathematical understanding, and the next instructional steps, commentary on the misconception or incomplete understanding so you learn why the student veered off course, three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks. It's time to break our habit of rushing into re-teaching for correctness and instead get curious about the space between right and wrong answers. *Mine the Gap for Mathematical Understanding* is a book you will return to again and again to get better at selecting tasks that will uncover students' reasoning better at discerning the quality and clarity of students' understanding and better at planning teaching based on the gaps you see.

180 Days: Problem Solving for Third Grade Kristin Kemp, 2016-10-03 *180 Days of Problem Solving* is a fun and effective daily practice workbook designed to help students improve critical thinking and reasoning skills. This easy to use third grade workbook is great for at home learning or in the classroom. The engaging standards based activities cover grade level skills with easy to follow instructions and an answer key to quickly assess student understanding. Students will focus on one skill each week to learn the problem solving process, use visual models, and solve multi-step non-routine word problems. Watch as students build problem solving skills with these quick independent learning activities. Parents appreciate the teacher approved activity books that keep their child engaged and learning. Great for homeschooling to reinforce learning at school or prevent learning loss over summer. Teachers rely on the daily practice workbooks to save them valuable time. The

The Dyscalculia Toolkit Ronit Bird, 2013-03-21

Lecturers, why waste time waiting for the post to arrive? Request and receive your e-inspection copy today! The new dyscalculia toolkit has a great introduction that is broken down into manageable chunks, brilliant explanations, and interesting reading. The new tables explain what each game entails at the start of the book, making planning and using the toolkit much easier and effective, especially if short on time. Very enjoyable to read and highly recommended. Karen Jones, Chartered Educational Psychologist, The Educational Guidance Service. With over 200 activities and 40 games, this book is designed to support learners aged 6 to 14 years who have difficulty with maths and numbers. Ronit Bird provides a clear explanation of dyscalculia and presents the resources in a straightforward fashion. New to this second edition: even more activities, games, and printable resources; additional material provided on the easily accessible CD-ROM; a table indicating which difficulties are supported by which activities; material that caters for a wider range of abilities and ages. This book and accompanying CD meet the needs of specialist and non-specialist teachers who are working with learners with difficulties in maths in mainstream settings. It is equally useful as a resource to recommend to parents who want to support their children's learning.
