ncert solutions for class 12 chapter 9 biotechnology - May 17 2022

aug 5 2013 chapter 9 biotechnology and recombinant dna biotechnology the use of microorganisms cells or cell components to make a product foods antibiotics vitamins

ncert book class 12 biology chapter 9 biotechnology - May 29 2023

dna cloning is the procedure of comprising multiple identical copies of a portion of dna this procedure necessitates the use of cloning vectors with the following characteristics 1 it should be smaller in size 2 it should be able to replicate independently 3 it should have a unique restriction enzyme site 4 it should be easy to insert and remove foreign dna 5 it should be stable in the host cell 6 it should be able to transform the host cell 7 it should be able to express the foreign gene 8 it should be able to integrate into the host genome 9 it should be able to be used for the production of recombinant proteins 10 it should be able to be used for the production of transgenic organisms 11 it should be able to be used for the production of vaccines 12 it should be able to be used for the production of gene therapy 13 it should be able to be used for the production of gene editing 14 it should be able to be used for the production of gene silencing 15 it should be able to be used for the production of gene expression 16 it should be able to be used for the production of gene regulation 17 it should be able to be used for the production of gene modification 18 it should be able to be used for the production of gene deletion 19 it should be able to be used for the production of gene insertion 20 it should be able to be used for the production of gene replacement 21 it should be able to be used for the production of gene amplification 22 it should be able to be used for the production of gene silencing 23 it should be able to be used for the production of gene expression 24 it should be able to be used for the production of gene regulation 25 it should be able to be used for the production of gene modification 26 it should be able to be used for the production of gene deletion 27 it should be able to be used for the production of gene insertion 28 it should be able to be used for the production of gene replacement 29 it should be able to be used for the production of gene amplification 30 it should be able to be used for the production of gene silencing 31 it should be able to be used for the production of gene expression 32 it should be able to be used for the production of gene regulation 33 it should be able to be used for the production of gene modification 34 it should be able to be used for the production of gene deletion 35 it should be able to be used for the production of gene insertion 36 it should be able to be used for the production of gene replacement 37 it should be able to be used for the production of gene amplification 38 it should be able to be used for the production of gene silencing 39 it should be able to be used for the production of gene expression 40 it should be able to be used for the production of gene regulation 41 it should be able to be used for the production of gene modification 42 it should be able to be used for the production of gene deletion 43 it should be able to be used for the production of gene insertion 44 it should be able to be used for the production of gene replacement 45 it should be able to be used for the production of gene amplification 46 it should be able to be used for the production of gene silencing 47 it should be able to be used for the production of gene expression 48 it should be able to be used for the production of gene regulation 49 it should be able to be used for the production of gene modification 50 it should be able to be used for the production of gene deletion 51 it should be able to be used for the production of gene insertion 52 it should be able to be used for the production of gene replacement 53 it should be able to be used for the production of gene amplification 54 it should be able to be used for the production of gene silencing 55 it should be able to be used for the production of gene expression 56 it should be able to be used for the production of gene regulation 57 it should be able to be used for the production of gene modification 58 it should be able to be used for the production of gene deletion 59 it should be able to be used for the production of gene insertion 60 it should be able to be used for the production of gene replacement 61 it should be able to be used for the production of gene amplification 62 it should be able to be used for the production of gene silencing 63 it should be able to be used for the production of gene expression 64 it should be able to be used for the production of gene regulation 65 it should be able to be used for the production of gene modification 66 it should be able to be used for the production of gene deletion 67 it should be able to be used for the production of gene insertion 68 it should be able to be used for the production of gene replacement 69 it should be able to be used for the production of gene amplification 70 it should be able to be used for the production of gene silencing 71 it should be able to be used for the production of gene expression 72 it should be able to be used for the production of gene regulation 73 it should be able to be used for the production of gene modification 74 it should be able to be used for the production of gene deletion 75 it should be able to be used for the production of gene insertion 76 it should be able to be used for the production of gene replacement 77 it should be able to be used for the production of gene amplification 78 it should be able to be used for the production of gene silencing 79 it should be able to be used for the production of gene expression 80 it should be able to be used for the production of gene regulation 81 it should be able to be used for the production of gene modification 82 it should be able to be used for the production of gene
