Shattock, 2010-09-16 There is no truer text to the topic than Managing Successful Universities The second edition is a full revision in which globalisation managing financial disjuncture and the enhancement of research performance all loom larger than before Like its predecessor this book will be used throughout the English speaking world and beyond Professor Simon Marginson Centre for the Study of Higher Education University of Melbourne This is the manual par excellence for modern university leadership and management In my role as a business school dean it is by far the most useful single book I have ever read and continue to read Professor Mark Taylor Dean Warwick Business School University of Warwick When I began

my career in university management there was just one book on managing UK universities Now there must be twenty or thirty but none is as comprehensive authoritative readable and important as Shattock's *Managing Successful Universities* Read this valuable book and learn much from it David Palfreyman Director of OXCHEPS and Bursar New College University of Oxford This bestselling book defines good management in a university context and how it can contribute to university success Extensively updated to reflect political financial and social developments since the first edition it includes a new chapter on the management of teaching and research and gives in depth coverage to managing retrenchment and the importance of human resource management Drawing on the literature of management in the private sector as well as from higher education and on the experience of the author it emphasizes The holistic characteristics of university management The need to be outward looking and entrepreneurial in management style and The ways successful universities utilize the market to reinforce academic excellence

*Multidimensional Ranking* Frans A. van Vught, Frank Ziegele, 2012-02-22 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale

**University Rankings** William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan's higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to

promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

*Academic Irregularities* Liz Morrish, Helen Sauntson, 2019-08-23 This volume serves as a critical examination of the discourses at play in the higher education system and the ways in which these discourses underpin the transmission of neoliberal values in 21st century universities Situated within a Critical Discourse Analysis based framework the book also draws upon other linguistic approaches including corpus linguistics and appraisal analysis to unpack the construction and development of the management style known as managerialism emergent in the 1990s US and UK higher education systems and the social dynamics and power relations embedded within the discourses at the heart of managerialism in today's universities Each chapter introduces a particular aspect of neoliberal discourse in higher education and uses these multiple linguistic

approaches to analyze linguistic data in two case studies and demonstrate these principles at work This multi layered systematic linguistic framework allows for a nuanced exploration of neoliberal institutional discourse and its implications for academic labor offering a critique of the managerial system in higher education but also a larger voice for alternative discursive narratives within the academic community This important work is a key resource for students and scholars in applied linguistics Critical Discourse Analysis sociology business and management studies education and cultural studies

**Bullshit Comparisons** Andrew Brooks, 2024-06-06 Bullshit Comparisons will challenge the way you think about rankings charts and other marketing and political tools designed to create odious and dangerous comparisons Is Boris Johnson really like Winston Churchill Are electric cars actually greener than petrol ones Which is the world s most successful university Is Lisbon the new Barcelona Should we compare the achievements of younger and older siblings even when we know it damages their self worth We make comparisons every day but how helpful are they Looking across a dazzling range of situations both familiar and unfamiliar Bullshit Comparisons is a ground breaking examination of the role of comparison in modern society illuminated by examples spanning from the FIFA World Footballer of the year to wine tasting in London hospital care in Sierra Leone and avocado farming in Colombia Challenging us to think critically about the use of comparison through accessible personal and often amusing research Andrew Brooks reveals the uses and abuses of comparisons in a book that isn t like anything else you have read

Quality in Higher Education David Andrew Turner, 2012-01-01 The quality of higher education is a hot topic especially as students around the world are asked to pay more towards their own education and expect to get what they pay for In addition league tables both national and international have come to dominate discussion with several governments and many institutions setting themselves the goal of improving their ratings In this volume Professor Turner examines the assumptions that are being made about what counts as quality and what the traditional purposes of universities are But with

the growth of mass higher education and the rise of student centred approaches to learning and teaching it has become increasingly clear that high quality education is education that meets the needs of the student at that particular moment and promotes their future development After examining a range of different approaches to the quality of higher education and its measurement Professor Turner develops an approach to benchmarking and quality enhancement that is better suited to the ethos of individualised learning and uses it to critique the philosophies that have dominated debates about quality to date This book will be of interest to scholars of higher education but also has something important to add to debates that engage policy makers in higher education It provides a background to the historical development of universities which might help postgraduate students and new members of faculty understand the process in which they are engaged Leadership for World-Class Universities Philip G. Altbach, 2011-07-21 Leadership for World Class Universities reveals how world class thinking and policy can help university leaders employ modern solutions to the challenges facing higher education today Readers will benefit from best practice advice offered by distinguished international contributors who have excelled by thinking globally without losing sight of their respective national and local environments Their essays are grounded in empirical research and written to engage the reader stimulate reflection and enhance performance This book focuses especially on developing and middle income countries which face special problems where higher education is expanding most rapidly Key themes include strategic planning governance of academic institutions the role of the academic profession fundraising student access and equity the impact of globalization Leadership for World Class Universities is a valuable resource for senior university administrators At the heart of this volume is a focus on how academic leaders can work towards resolving the complex issues facing universities today *Getting into Dental School* Adam Cross (College vice-principal), 2019-03-01 Covering every aspect of the application process from writing a winning personal statement to interview techniques and career prospects Getting into Dental School has all of the essential information would be dental students need to secure a place on the course of their choice **But... How do you Teach Business?** Chris Hackley, 2024-08-06 Employing a critical yet humorous style Chris Hackley draws on 40 years of education experience to examine business education and its wider societal role He presents a historical perspective alongside various topical and personal accounts to answer the crucial question how do you actually teach business University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in

policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

**University Rankings, Diversity, and the New Landscape of Higher Education**, 2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector

Gender And The Changing Face Of Higher Education: A Feminized Future? Leathwood, Carole, Read, Barbara, 2008-12-01 Drawing on international and national data theory and research Gender and the Changing Face of Higher Education provides an accessible but nuanced discussion of the feminization of higher education for postgraduates policy makers and academics working in the field

*Excellence in Teaching and Learning in Higher Education* Isabel Huet, Teresa Pessoa, Fátima Sol, 2021 The initial idea for the book emerged during the seminar Sharing of Innovative Pedagogical Practices that occurred at the University of Coimbra Portugal in 2018 Like all good ideas this one originated in a conversation between colleagues from the University of Coimbra and the University of West London in the United Kingdom The idea of this book was to move away from sharing experiences related to teaching and learning in higher education in just one or two countries but instead to organise a more European view about the policy research and teaching practices that are shaping the way our students learn academics teach and do research We have a total of 16 chapters from academics in Portugal the United Kingdom Ireland Sweden the Netherlands Spain Italy and the Czech Republic The book is organised in four interrelated themes 1 policy and quality 2 professionalisation of teaching and academic development 3 research and teaching nexus and 4 pedagogy and practice Enjoy reading the book
