The Food & Drug Administration (FDA) is looking for ways to make the drug approval process more efficient and less costly. One way to do this is by encouraging the development of new drugs that are "breakthrough" or "fast-track" drugs. These are drugs that are expected to be significantly better than existing drugs for the same condition. The FDA has a number of programs in place to encourage the development of these drugs, including the Breakthrough Therapy Program, the Fast Track Program, and the Accelerated Approval Program. Good University Guide Ranking:

Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars

Global University Rankings T. Erkkilä, 2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe

Rankings and the Reshaping of Higher Education E. Hazelkorn, 2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

The Times Good University Guide 2007 John O'Leary, 2006 YEARBOOKS ANNUALS ALMANACS How do you find the best university for the subject you wish to study You need a guide that evaluates the quality of what is available giving facts figures and comparative assessments of universities Since 1992 The Times has produced the most widely respected and used university league tables The Guide takes the key measures of quality as its focus so you can make informed choices of university and subjects Still unique and still controversial the rankings provide

hard data analysed interpreted and presented by a team of experts The 2009 edition of the best selling Good University Guide has been further extended Two pages of information on each university Detailed coverage of Oxford and Cambridge colleges Information specifically designed for international students University Rankings, Diversity, and the New Landscape of Higher Education ,2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector **The Global Academic Rankings Game** Maria Yudkevich, Philip G. Altbach, Laura E. Rumbley, 2016-03-02 The Global Academic Rankings Game provides a much needed perspective on how countries and universities react to academic rankings Based on a unified case methodology of eleven key countries and academic institutions this comprehensive volume provides expert analysis on this emerging phenomenon at a time when world rankings are becoming increasingly visible and influential on the international stage Each chapter provides an overview of government and national policies as well as an in depth examination of the impact that rankings have played on policy practice and academic life in Australia Chile China Germany Malaysia the Netherlands Poland Russia Turkey the United Kingdom and the United States The Global Academic Rankings Game contributes to the continuing debate about the influence of rankings in higher education and is an invaluable resource for higher education scholars and administrators as they tackle rankings in their own national and institutional contexts University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher

education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

The Impact of Higher Education Ranking Systems on Universities Kevin Downing, Petrus Johannes Loock, Sarah Gravett, 2021-04-04 This book written by three generations of rankings academics with considerable experience from three very different regions of the globe lifts the lid on the real impact of higher education ranking systems HERS on universities and their stakeholders It critically analyses the criteria that make up the Big Three global ranking systems and using interviews with senior administrators academics and managers discusses their impact on universities from four very different continents Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS Despite all the opinions and arguments about the legitimacy of the rankings as a construct it seems experts agree that they are here to stay The question therefore seems to be less about whether or not universities should be compared and ranked but the manner in which this is undertaken Delivering a fresh perspective on global rankings this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions South Africa the Arab region South East Asia and Australia It will appeal to any academic student university administrator or governing body interested in or affected by global higher education ranking systems **Global**

Perspectives on Higher Education Philip G. Altbach, 2016-04 The single best book on higher education as a global phenomenon Over the past half century globalization has had a profound impact on postsecondary education The twin forces of mass higher education and the global knowledge economy have driven an unprecedented transformation These fundamental changes have pulled in opposite directions one pushes for wider access and accompanying challenges of quality the other toward exclusive world class research oriented universities In *Global Perspectives on Higher Education* renowned higher education scholar Philip G Altbach offers a wide ranging perspective on the implications of these key forces and explores how they influence academe everywhere Altbach begins with a discussion of the global trends that increasingly affect higher education including the implications of mass enrollments the logic of mass higher education systems around the world and specific challenges facing Brazil Russia India and China He considers the numerous implications of globalization including the worldwide use of the English language university cross border initiatives the role of research universities in

developing countries the impact of the West on Asian universities and the expansion of private higher education Provocative and wide ranging *Global Perspectives on Higher Education* considers how the international exchange of ideas students and scholars has fundamentally altered higher education Multidimensional Ranking Frans A. van Vught, Frank Ziegele, 2012-02-21 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale Global University Rankings and the Politics of Knowledge Michelle Stack, 2021-06-17 For many institutions to ignore your university's ranking is to become invisible a risky proposition in a competitive search for funding But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university Drawing on a range of research and inquiry based methods *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact Conceptually unique in its scope *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice *MBA for Medics* Emma Stanton, Claire Lemer, 2021-04-05 Increasingly

them disproportionately influential in constructing the international This point holds true for Western actors materials and approaches in general and for Anglo American and sometimes French ones in particular However these patterns are set for disruption As the world moves past an era of Western dominance and toward greater multipolarity it is imperative for international lawyers to understand the perspectives and approaches of those coming from diverse backgrounds By taking readers on a comparative tour of different international law academies and textbooks the author encourages them to see the world through the eyes of others an essential skill in this fast changing world of shifting power dynamics and rising nationalism

EBOOK: Gender and the Changing Face of Higher Education: A Feminized Future? Carole Leathwood,Barbara Read,2008-12-16 A notable feature of higher education in many countries over the last few decades has been the dramatic rise in the proportion of female students Women now outnumber men as undergraduate students in the majority of OECD countries fuelling concerns that men are deserting degree level study as women overtake them both numerically and in terms of levels of achievement The assertion is that higher education is becoming increasingly feminized reflecting similar claims in relation to schooling and the labour market At the same time there are persistent concerns about degree standards with

allegations of dumbing down This raises questions about whether the higher education system to which more women have gained access is now of less value both intrinsically and in terms of labour market outcomes than previously This ground breaking book examines these issues in relation to higher education in the UK and globally It provides a thorough analysis of debates about feminization asking To what extent do patterns of participation continue to reflect and re construct wider social inequalities of gender social class and ethnicity How far has a numerical increase in women students challenged the cultures curriculum and practices of the university What are the implications for women men and the future of higher education Drawing on international and national data theory and research Gender and the Changing Face of Higher Education provides an accessible but nuanced discussion of the feminization of higher education for postgraduates policy makers and academics working in the field
