Office of Education, 1936 *European Dimensions and the Secondary School Curriculum* Ivor Goodson, Veronica McGivney, 2018-10-03 Originally published in 1985 Europe and the EEC seemed to be virtually synonymous for the majority of our population and the ambivalent feelings many people have about the Community together with the consistently bad press it received in the UK seemed to engender a hostility in educational circles towards teaching about Europe as a whole However if one of the aims of education is to increase children s awareness tolerance and understanding of the world about them to widen their experience and horizons then teaching about the wider world must have a place in the curriculum This book argues for education about Europe not necessarily in favour of Europe breaking down the national insularity of the UK curriculum and using Europe as one convenient window on the wider world Industrial Arts & Vocational Education ,1915
