Smith, 2018-11-15 This book brings together leading scholars from around the world to provide their most influential thinking on instructional feedback. The chapters range from academic in depth reviews of the research on instructional feedback to a case study on how feedback altered the life course of one author. Furthermore, it features critical subject areas including mathematics, science, music, and even animal training, and focuses on working at various developmental levels of learners. The affective and non-cognitive aspects of feedback are also targeted, such as how learners react emotionally to receiving feedback.
