The Civil War Era: A Nation Divided
and Reborn (1844-1877)

The mid-1800s century in the United States was dominated by the burning issues of the Civil War, a conflict that would ultimately divide the nation very much. This era, from 1844 to 1877, witnessed the country's greatest regional tensions, a period of intense political and economic transformation.

The emergence of the Transcontinental Railroad, the expansion of the cotton industry, and the rise of the abolitionist movement were all key factors in the development of the nation during this period.

The Supreme Court, which had been established in 1789, played a crucial role in the nation's development. Its decisions, particularly regarding slavery in the territories, were highly controversial. The emergence of the Republican Party, with its anti-slavery platform, and the election of Abraham Lincoln in 1860, were seen by many in the South as direct threats to their way of life and the constitutional legacy.
