

## CM921 WIRELESS PROGRAMMABLE THERMOSTAT

### PRODUCT SPECIFICATION SHEET

The **CM921** thermostat is designed to provide automatic time and temperature control of heating or cooling systems in villas and apartments.

It can be used as part of a system in conjunction with combi-boilers, oil-burners and gas fired boilers, circulation pumps, thermal actuators, zone valves and electric heating systems (<10A). In combination with other **CM921** room units and **HC60NG** receivers it can be used to control multi-zone applications (up to 4 zones).

The radio frequency controlled **CM921** system pack consists of a room unit **CMT921A** and a relay box **R-6660D (HC60NG)**. No wiring to the room unit is required. The installer only needs to wire the relay box to the controlled device (e.g. boiler) and mount the room unit in a suitable location where RF communication is reliable. The **CM921** uses reliable RF communication technology in the 868MHz band.

The **CM921** extra large LCD display, dynamic text display and controls layout are identical to the **CM901** 'wired' thermostat. The unit is ideal for consumers who want reliable and precise temperature control from a modern looking, simple to program and easy-to-use product.

### FEATURES

- **CM921** can be installed without disrupting your room décor as no wiring connection is required between the room unit and the boiler
- Attractive, slim, ultra-modern styling makes it ideal for location in any type of home
- 1-day heating programming
- A dynamic text display on the LCD that gives enhanced feedback to the user / installer
- LCD Backlighting to illuminate the display for easier viewing in low light conditions
- Reliable RF communication utilising 868 MHz band with 1 % duty cycle limit to minimise communication disturbance
- Every room unit can be bound with several relay boxes (e.g. to control several electric heating panels)
- Armchair programmed
- **Holiday** button that provides energy savings by reducing to a constant temperature for 1 to 99 days when people are on holiday, returning to normal operation (AUTO or MANUAL) on the day of their return.
- EEPROM memory holds the user program indefinitely
- OFF position has an integral frost protection setting at minimum 5°C (installer adjustable) so that pipes in the house will never freeze in winter.
- Communication compatibility with other Honeywell product such as **HR80**, **HMS80** and **HCES0**.
- **CM921** can be used to control a zoning system with up to 4 zones
- Maximum system efficiency and extended boiler life due to unique zoning system synchronisation
- Automatic Summer / Winter time change adjusts the time automatically to daylight saving time.
- Standard room units and receiver boxes are used for zoning applications algorithm
- When used with the table top stand the room unit can be positioned anywhere in the room where RF communication is reliable
- 24...230V 16A resistive, 3A inductive SPDT relay provides compatibility with most domestic central heating systems reducing the need to stock many different models.
- The **HC60NG** may be surface or wallbox mounted.
- Installer Set-Up Mode allows extra functions to be set at the discretion of the installer to match the consumer applications and needs:
  - Optimisation
  - Pump Exercise
  - Upper / Lower Setpoint Limit Adjust
  - Temperature offset
  - Minimum ON time
  - Cycle rate
  - Heat / Cool Operation
  - Proportional Band Width
  - Fail-safe mode for communication loss
