- Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group was exposed to the control condition, and the experimental group was exposed to the experimental condition. The control condition was a standard condition, and the experimental condition was a modified condition. The subjects were exposed to the conditions for a period of time, and then their responses were recorded. The results were then compared between the two groups.
