assembled into a coherent course of conduct And rather than being risk takers those who are most successful in business are risk minimizers Huge gains these case studies reveal are most reliably obtained in circumstances where the entrepreneur has established careful provisions for risk reduction As for the view that innovation makes success possible the authors find that because innovation is an expensive process that takes a long time to produce profits innovators first of all require capital success makes innovation possible The necessary resources they show are most often derived from what they provocatively term predation ruthlessly taking advantage of imperfections weaknesses and vulnerabilities within the market or among competitors Finally From Predator to Icon considers the practical ethics implemented during the phase in which capital is most rapidly accumulated as well as the social consequences of these activities Drawing on interviews with some of their subjects and crucially close readings of the authorized biographies and other hagiographic accounts of these figures which eliminates the bias of malicious interpretations Vilette and Vuillermot provide revelatory insights about the creation and maintenance of business wealth that will be profitably read by both the captains and the critics of contemporary capitalism

The Natural Step for Business Brian Nattrass, Mary Altomare, 1999-01-01 The Natural Step for Business examines how four very successful evolutionary corporations in Sweden and the United States including IKEA and Scandic Hotels in Sweden and Collins Pine and Interface in the U S are positioning themselves for long term competitiveness using The Natural Step as a central part of their corporate strategy Nattrass and Altomare puncture the myth that a company must choose between profitability and care for the natural environment and present a timely and practical application of this exciting model for global sustainability *Ikea* Johan Stenebo, 2021-09-07 *Design by IKEA* Sara Kristoffersson, 2014-10-23 Sara Kristoffersson s compelling study provides the first sustained critical history of IKEA Kristoffersson argues that the company s commercial success has been founded on a neat alignment of the brand with a particular image of Swedish national identity one that is bound up with ideas of social democracy and egalitarianism and its material expression in a pared down functional design aesthetic Employing slogans such as Design for everyone and Democratic design IKEA signals a rejection of the stuffy the chintzy and the traditional in both design practices and social structures Drawing on original research in the IKEA company archive and interviews with IKEA personnel Design by IKEA traces IKEA s symbolic connection to Sweden through its design output and its promotional materials to examine how the company both promoted and profited from the concept of Scandinavian Design The National Launch of an International Brand Nükhet Vardar, 2018 In the story of IKEA we see how its founder Ingvar Kamprad started his business in a village in 1943 under conditions where scarcity was the norm However by putting his heart and creativity into every single step he took questioning the usual way of doing business trying to do things differently by applying innovation he began getting better market results than others had done This case presents the backstory to how IKEA grew and how it became an international operation In addition we examine in context the criteria for becoming an international brand and see how global marketing can be practiced without alienating local

markets Some international marketing strategies of IKEA are also discussed by analyzing the IKEA entry strategy into the Turkish market in 2005 learning the approach taken at its launch which elements of marketing were standardized and which were adapted for improving market results In this case we see whether the IKEA entry strategy into the Turkish market yielded the expected market results and also consider the required success conditions for attaining satisfactory results in global marketing

Unpacking IKEA Pauline Garvey, 2017-11-23 This book represents the first anthropological ethnography of Ikea consumption and goes to the heart of understanding the unique and at times frantic popularity of this one iconic transnational store. Based on a year of participant observation in Stockholm's Kungens Kurva store, the largest in the world, this book places the retailer squarely within the realm of the home building efforts of individuals in Stockholm and to a lesser degree in Dublin. Ikea, the world's largest retailer, and one of its most interesting is the focus of intense popular fascination internationally yet is rarely subject to in-depth anthropological inquiry. In *Unpacking Ikea*, Garvey explores why Ikea is never just a store for its customers and questions why it is described in terms of a cultural package as everyday and classless. Using in-depth interviews with householders over several years, this ethnographic study follows the furniture from the Ikea store outwards to probe what people actually take home with them.
