#### INSTALLING THE 6150RF

Locate the 6150RF in an area and at a height where it is convenient for user operation. The 6150RF must be at least 10 feet from the control panel to ensure proper operation of the RF receiver. Perform the following steps to install the 6150RF.

1. Push the two case release snaps at the bottom of the keypad with the blade of a medium screwdriver (this will push in the release snaps), then pull that side of the case back away. Insert the screwdriver in the side of the keypad (between the front and back case) and gently twist to release the side locking tab. Repeat for the other side. Refer to Figure 1 for location of the case back release snaps and locking tabs.
2. Route the wiring from the control panel through the opening in the case back. (See the control panel's instructions for proper wire run lengths.)
3. Mount the case back directly to a wall or electrical gang box.
4. Connect the power and data wires from the control panel to the terminals on the 6150RF as indicated in the wiring table adjacent to Figure 2.

5. Connect the wires for the relay output (if used) to the terminals on the 6150RF's PC board.
6. Reattach the keypad to its case back.

**Note:** Upon power-up or exit of the Program Mode, the 6150RF alternately flashes "Ad" and the 2-digit keypad address and the 3-digit receiver address on the display. Press any key to display the system status.
