Frank, Bruce W. Long, Barbara J. Smith, 2011-03-18 This is a Pageburst digital textbook With more than 400 projections presented Merrill's Atlas of Radiographic Positioning and Procedures remains the gold standard of radiographic positioning texts Authors Eugene Frank Bruce Long and Barbara Smith have designed this comprehensive resource to be both an excellent textbook and also a superb clinical reference for practicing radiographers and physicians You ll learn how to properly position the patient so that the resulting radiograph provides the information needed to reach an accurate diagnosis Complete information is included for the most common projections as well as for those less commonly requested

Comprehensive coverage of anatomy and positioning makes Merrill's Atlas the most in depth text and reference available for radiography students and practitioners. Essential projections that are frequently performed are identified with a special icon to help you focus on what you need to know as an entry level radiographer. Full color presentation helps visually clarify key concepts. Summaries of pathology are grouped in tables in positioning chapters for quick access to the likely pathologies for each bone group or body system. Special chapters including trauma, surgical radiography, geriatrics, pediatrics, and bone densitometry help prepare you for the full scope of situations you will encounter. Exposure technique charts outline technique factors to use for the various projections in the positioning chapters. Projection summary tables at the beginning of each procedural chapter offer general chapter overviews and serve as handy study guides. Bulleted lists provide clear instructions on how to correctly position the patient and body part. Anatomy summary tables at the beginning of each positioning chapter describe and identify the anatomy you need to know in order to properly position the patient, set exposures, and take high quality radiographs. Anatomy and positioning information is presented in separate chapters for each bone group or organ system, all heavily illustrated in full color and augmented with CT scans and MRI images to help you learn both traditional and cross sectional anatomy. Includes a unique new section on working with and positioning obese patients. Offers coverage of one new compensating filter. Provides collimation sizes and other key information for each relevant projection. Features more CT and MRI images to enhance your understanding of cross sectional anatomy and prepare you for the Registry exam. Offers additional digital images in each chapter including stitching for long length images of the spine and lower limb. Standardized image receptor sizes use English measurements with metric in parentheses. Depicts the newest equipment with updated photographs and images.

Merrill's Atlas of Radiographic Positioning and Procedures Eugene D. Frank, 2011. With more than 400 projections presented, this atlas remains the gold standard of radiographic positioning texts. You'll learn how to properly position the patient so that the resulting radiograph provides the information needed to reach an accurate diagnosis.

Merrill's Atlas of Radiographic Positioning & Procedures Eugene D. Frank, Bruce W. Long, Barbara J. Smith, 2007. The bible of radiography, this comprehensive resource presents more than 400 projections. Clear step by step instructions explain all commonly performed procedures. Merrill's shows how to properly position the patient so that each radiograph provides the information the physician needs to make a correct diagnosis. Separate chapters cover each bone group or organ system, all illustrated in full color and augmented with MRI images as appropriate. This text is so highly regarded that many state boards and the American Registry of Radiologic Technologists refer to it when designing their certification exams. Special chapters help students prepare for the full scope of experiences as a radiographer. Summaries of pathology describe and define conditions. Summaries of projections list all projections by anatomical area. Exposure technique charts in positioning chapters list technique factors for the various projections. New Compensating Filters chapter explains how filters are used in patient positioning, presents photographs of all the filters currently in use, and provides samples of

radiographs produced using the filters A special icon identifies selected projections that are enhanced with the use of an appropriate compensating filter Enhanced content includes material on age related competencies More than 90 new high quality radiographs include many new MRI and CT images A digital radiography icon identifies projections that require special consideration when using digital imaging Expanded anatomy sections include over 40 CT and MRI images to augment the traditional anatomy art covering sectional anatomy at the same time as traditional anatomy and preparing students for the proposed new CT competency Abbreviations boxes highlight the abbreviations used in each chapter for quick reference New and revised projections include New axial lateromedial projection Coyle Method of the elbow Modified AP oblique projection of the acetabulum Judet Method Twinning Method Pawlow Method and Modified Pawlow Method of imaging the cervicothoracic region modified and simplified into one projection
