Writing Their Future Selves: Instructional Strategies to Affirm Student Identity Miriam Plotinsky, 2023-11-07 Whatever subject you teach you can encourage students' sense of self-worth. I'm a bad writer is a disclaimer every secondary teacher has heard many times. Overcoming that negative self-image Plotinsky argues is key to helping students build a positive academic identity and because of the vulnerability associated with sharing what we write the benefits of interrupting this particular form of deficit thinking extend far beyond English class. Drawing on her years of experience as an English teacher and literacy specialist Miriam Plotinsky uses writing instruction as a powerful vehicle to examine how teachers can help students build a sense of themselves as legitimate valuable contributors to the world around them. The chapters move fluidly through ways to build capacity such as celebrating student voice separating grading from class participation giving feedback that inspires trust and avoiding the labeling of students. Along the way teachers in other content areas contribute insights into how the identity-building strategies in the book can be applied to their own disciplines.

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten, expanded and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross-disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community.
