Improving Working Memory in Learning and Intellectual Disabilities Silvia Lanfranchi, Barbara Carretti, 2016-08-05 The last forty years of research have demonstrated that working memory WM is a key concept for understanding higher order cognition To give an example WM is involved in reading comprehension problem solving and reasoning but also in a number of everyday life activities It has a clear role in the case of atypical development too For instance numerous studies have shown an impairment in WM in individuals with learning disabilities LD or intellectual disabilities ID and several researchers have hypothesized that this can be linked to their difficulties in learning cognition and everyday life The latest challenge in the field concerns the trainability of WM If it is a construct central to our understanding of cognition in typical and atypical development then specific intervention to sustain WM performance might also promote changes in cognitive processes associated with WM The idea that WM can be modified is debated however partly because of the theoretical implications of this view and partly due to the generally contradictory results obtained so far In fact most studies converge in demonstrating specific effects of WM training i e improvements in the trained tasks but few transfer effects to allied cognitive processes are generally reported It is worth noting that any maintenance effects when investigated

are even more meagre In addition a number of methodological concerns have been raised in relation to the use of 1 single tasks to assess the effects of a training program 2 WM tasks differing from those used in the training to assess the effects of WM training and 3 passive control groups These and other crucial issues have so far prevented any conclusions from being drawn on the efficacy of WM training Bearing in mind that the opportunity to train WM could have a huge impact in the educational and clinical settings it seems fundamentally important to shed more light on the limits and potential of this line of research The aim of the research discussed here is to generate new evidence on the feasibility of training WM in individuals with LD and ID There are several questions that could be raised in this field For a start can WM be trained in this population Are there some aspects of WM that can be trained more easily than others Can a WM training reduce the impact of LD and ID on learning outcomes and on everyday living What kind of training program is best suited to the promotion of such changes

Closing the School Discipline Gap Daniel J. Losen, 2014-12-01 Educators remove over 3 45 million students from school annually for disciplinary reasons despite strong evidence that school suspension policies are harmful to students The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today's profound inequities in educational opportunity and outcomes Part I explores how suspensions flow along the lines of race gender and disability status Part II examines potential remedies that show great promise including a district wide approach in Cleveland Ohio aimed at social and emotional learning strategies Closing the School Discipline Gap is a call for action that focuses on an area in which public schools can and should make powerful improvements in a relatively short period of time

Studio Thinking 3 Kimberly M. Sheridan, Shirley Veenema, Ellen Winner, Lois Hetland, 2022-06-03 Studio Thinking 3 is a new edition of a now classic text a research based account of teaching and learning in high school studio arts classes It poses a framework that identifies eight habits of mind taught in visual arts and four studio structures by which they are taught This edition includes new material about how the framework has been used since the original study with new perspectives from artist teachers who currently apply the Studio Thinking Framework in their own practice It also reviews how contemporary organizations educators and researchers outside the arts have utilized the framework highlighting its flexibility to inform teaching and learning The authors have added a new chapter on assessment to introduce the practical and thoughtful ways that teachers are using Studio Thinking to assess and evaluate students work working processes and thinking in the arts Praise for Previous Editions of Studio Thinking Winner and Hetland have set out to show what it means to take education in the arts seriously in its own right The New York Times This book is very educational and would be helpful to art teachers in promoting quality teaching in their classrooms School Arts Magazine Studio Thinking is a major contribution to the field Arts Learning Review The research in Studio Thinking is groundbreaking and important because it is anchored in the actual practice of teaching artists The ideas in Studio Thinking continue to provide a vehicle with which to navigate and understand the complex work in which we are all engaged Teaching Artists Journal

Expanding the Numerical Central Conceptual Structure Laura Christine Bofferding, 2011 In working with integers students have difficulties that may extend into middle school and even adulthood However even young children can display insights into negative numbers well before receiving formal instruction Using a pre test instruction post test design this study explores how 61 first graders reason about negative number properties and operations and how their understanding changes depending on the instruction they receive Results of the study indicate that children build on their

existing whole number understanding to develop a central conceptual structure for integers Furthermore the process by which they extend their numerical central conceptual structure differs among students their initial schemas together with the form of the integer instruction influence how they reason about and solve integer addition and subtraction problems These results highlight the need to revisit the placement duration and content of integer instruction in curricula *Child and Adolescent Development for Educators* ,

Teaching Young Learners in a Superdiverse World Heather

Lotherington, Cheryl Paige, 2017-04-07 This book documents a collaborative action research project in one school where researchers and practitioners worked together to develop multimodal literacies and pedagogies for diverse multilingual elementary classrooms Following chronologically from Lotherington s Pedagogy of Multiliteracies 2011 this volume picks up after teachers and researchers have learned how to work efficiently as a learning community to offer project based learning approaches This edited collection relates how teachers and students of different grade levels language backgrounds and abilities developed a shared agenda and created a framework for effective and inclusive practices Contributors demonstrate that collaboration creative pedagogical solutions and innovative project based learning are all essential parts of learning and teaching socially appropriate and responsive literacies in a multimodal superdiverse world *Illinois Issues* ,2006
