Damon J. Gray, 2013-11-12 Faith is neither static nor instantaneous. It is not something we stumble upon and instantly understand. Neither is it a monolithic, one-dimensional, singular entity that has but one face, one color, one fragrance. It is many-faceted, multi-dimensional, and appears differently depending on one's angle to the Son. In Finding Faith in Slow Motion, Damon Gray examines faith from myriad angles and through gut-wrenching life experiences as he asks regarding faith: What is that stuff? Spanning the emotional gamut from laughter to tears, Gray challenges us to define our faith and redefine it to look at it from a multitude of perspectives and define it again. The writing is intentionally evocative and playful, offering the reader the ability to identify with Gray as he wrestles with the weighty subject matter of finding faith. **Chariot Wheels in Motion**

What's the Buzz Hot or Not In the Public Eye Garbage In Garbage Out *Faith in Life* Donald J. Morse, 2019-01-29 This is the first book to consider John Dewey's early philosophy on its own terms and to explicate its key ideas. It does so through the fullest treatment to date of his youthful masterwork *The Psychology*. This fuller treatment reveals that the received view which sees Dewey's early philosophy as unimportant in its own right is deeply mistaken. In fact, Dewey's early philosophy amounts to an important new form of idealism. More specifically, Dewey's idealism contains a new logic of rupture which allows us to achieve four things: A focus on discontinuity that challenges all naturalistic views including Dewey's own later view; A space of critical resistance to events that is at the same time the source of ideals; A faith in the development of ideals that challenges pessimists like Schopenhauer and Nietzsche; and A non-traditional reading of Hegel that invites comparison with cutting-edge Continental philosophers such as Adorno, Derrida, and Žižek, and even goes beyond them in its systematic approach. In making these discoveries, the author forges a new link between American and European philosophy, showing how they share similar insights and concerns. He also provides an original assessment of Dewey's relationship to his teacher George Sylvester Morris and to other important thinkers of the day, giving us a fresh picture of John Dewey, the man and the philosopher in the early years of his career. Readers will find a wide range of topics discussed, from Dewey's early reflections on Kant and Hegel to the nature of beauty, courage, sympathy, hatred, love, and even death and despair. This is a book for anyone interested in the thought of John Dewey, American pragmatism, Continental Philosophy, or a new idealism appearing on the scene. **Faith in Science** Gabriel R. Ricci, 2018-01-18 There is growing academic interest in addressing the relationship of religion and science. There are also very generous funding sources that encourage scientists to demonstrate the reality of purpose in the world. Still, there are organizations offering support to community groups dedicated to discussing religion and science. Contributors explore this development in *Faith in Science*. The intellectual initiatives analyzed here seem far removed from the deep religious and cultural divisions that dominate the contemporary geopolitical landscape. This emerging industry, however, originates in a cultural debate that set the evolutionary view of Nature against revelation's conception of Nature as the fulfillment of God's creation. The two worldviews are hopelessly mismatched, although scientific creationism purports to have uncovered scriptural evidence that invites another look. Along the way, the imposition of theological themes onto the geological record became a tendency for many naturalists. Peter Medawar's scathing review of Teilhard de Chardin's *The Phenomenon of Man* in 1961 remains as a warning for those who mix Darwinian orthodoxy and theological parlance. The challenge Medawar would have us believe is not to abandon the exacting methods and logic of science in favor of a poetic dream of how consciousness is a manifestation of energy. But does this mean that science and religion are only methodologically demarcated? Must we insist on the traditional boundaries instituted by scientific conventions and religious beliefs? From various historical, religious, and scientific vantage points, contributors to this volume, who include Guy Consolmagno, Donald Kraybill, David Ray Griffin, Gerald L. Schroeder, Robert Pollack, Robert Pennock, Carol Wayne Wright, Bill

Durbin Kathleen Duffy and Anthony Matteo take up these challenges
