*Enhancing the Freedom to Flourish in Higher Education* Talita M. L. Calitz, 2018-08-06 Persistent educational economic and social inequalities perpetuate unequal participation in higher education for a significant number of students in both developing and developed contexts offering these students fewer opportunities to convert academic resources into equal participation *Enhancing the Freedom to Flourish in Higher Education* explores the insight that student narratives can offer to the debate surrounding the complex reasons of why some students flourish at university while others are marginalised socially and academically Proposing a new model of equal participation that draws not only on international comparisons but is also embedded in the experiences of students the book offers practical suggestions on how to enhance opportunities for equal participation Using South Africa as a case study the book tracks the experiences of eight undergraduate students whose narratives illuminate the structural inequalities affecting participation in higher education Despite the political economic and academic factors that lead to diminished participation the book foregrounds the resources that students used to negotiate obstacles and grounds these individual narratives in broader global debates around justice widening participation and equality in higher education *Enhancing the Freedom to Flourish in Higher Education* brings critical social theory to the problem of unequal participation so as to challenge the invisible and implicit forms of inequality found within student narratives It will appeal to lecturers and tutors practitioners based in student affairs and policy makers as well as postgraduate students

**Equity and Access to High Skills through Higher Vocational Education** Elizabeth Knight, Ann-Marie Bathmaker, Gavin Moodie, Kevin Orr, Susan Webb, Leesa Wheelahan, 2022-03-08 This book explores new and distinctive forms of higher vocational education across the globe and asks how the sector is changing in response to the demands of the 21st century These new forms of education respond to two key policy concerns an emphasis on high skills as a means to achieve economic competitiveness and the promise of open access for adults hitherto excluded from higher education Examining a range of geographic contexts the editors and contributors aim to address these contexts and highlight

various similarities and differences in developments They locate their analyses within the various political and socio economic contexts which can make particular reforms possible and achievable in one context and almost unthinkable in another Ultimately the book promotes a critical understanding of evolving provisions of higher vocational education refusing assumptions that policy borrowing from apparently successful countries offers a straightforward model for others to adopt
