Assessments of Regional and Global Environmental Risks Alexander E. Farrell,Jill Professor Jäger,2010-09-30 As environmental challenges grow larger in scale and implications it is increasingly important to apply the best scientific knowledge in the decisionmaking process Editors Farrell and J ger present environmental assessments as the bridge between the expert knowledge of scientists and engineers on the one hand and decisionmakers on the other When done well assessments have a positive impact on public policy the strategic decisions of private firms and ultimately the quality of life for many people This book is the result of an international interdisciplinary research project to analyze past environmental assessments and understand how their design influenced their effectiveness in bringing scientific evidence and insight into the decisionmaking process The case studies in the book feature a wide range of regional and global risks including ozone depletion transboundary air pollution and climate change Assessments of Regional and Global Environmental Risks offers several important contributions It provides a clear account of the choices faced in the design of environmental assessments

and a clear description of the lessons learned from past assessments It illustrates why assessments are social processes not simply reports And while they identify no universal one size fits all design the authors find that to be effective environmental assessments must be viewed by those who produce and use them as being salient credible in their scientific support and legitimate or fair in design and execution **World in Transition: Ways Towards Global Environmental Solutions**

German Advisory Council on Global change (WBGU),2012-12-06 At the first Conference of the Parties of the Climate Convention in Berlin in Spring 1995 it became evident once again To counteract anthropogenic climate changes individuals as well as societies have to change their way of thinking and behavior This accounts for other areas of global environmental change as well Global trends like soil degradation loss of biological diversity water scarcity and population growth show little or no sign of improvement In fact in most areas a rapid deterioration has taken place In its latest Report the German Advisory Council on Global Change describes Ways Towards Global Environmental Solutions Our Global Environment Anne Nadakavukaren,Jack Caravanos,2020-01-23 Our Global Environment regarded for decades as the quintessential introduction to environmental health for its authoritative coverage and cogent prose provides a richly detailed survey of current environmental issues In compelling language Anne Nadakavukaren and new coauthor Jack Caravanos describe the crucial interdependence between humans and their environment exploring the varied ways in which human activities have impacted degraded or altered the environment and the consequences to both natural ecosystems and human health and well being The eighth edition features a new chapter on climate change and the public health impacts of global warming incorporating the latest assessments of the Intergovernmental Panel on Climate Change with regard to the physical science basis mitigation efforts and adaptation strategies Extensive revisions and updates throughout the volume reflect current topics of concern including the magnitude of global hunger and malnutrition outbreaks of the Zika virus vaping and the incidence of serious lung injury MTBE contamination of groundwater recycling of lead acid batteries in developing countries mercury exposure among artisanal gold miners and lead contaminated drinking water in Flint Michigan and other communities Readers will appreciate the addition of 16 pages of color images as well as the authors emphasis on opportunities for public participation in the decision making processes that profoundly influence health and environmental quality **Teaching in a Globally-Connected World** Ervin F. Sparapani,Pamela L. Ross McClain,2016-07-29 This book examines the current social political economic and religious climate of the world makes projections for the future and then makes suggestions for what the contributors believe educators need to think about in order to adequately prepare young people to successfully navigate that future We live in a globally connected world and young people as they move into the future need to be prepared to live in that future Schools and teachers tend to focus on the present which is okay however schools and teachers must decide what is important to know in the present in order for young people to be successful in the future The responsibility of education today must be to prepare learners to live in an unknown future that is global and not

be so focused on an uncertain present *Environmental Science* Daniel D. Chiras, 2006 Completely updated the seventh edition of *Environmental Science* enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future **Conscious (R)Evolution, Humanity, Insanity, and the Planet** Michael Anthony, 2024-01-05 In *Conscious R Evolution Humanity Insanity and the Planet* the author brings together two powerful insights that all life on this planet is interconnected and that humanity's current path of consumerism and industrialization is leading to catastrophe From deforestation to pollution we are damaging the very environment that sustains us This book asks us to stop and consider the bigger picture as an intelligent species why would we willingly destroy the planet that gave us life With urgency and clarity the author calls for a new way of living one that recognizes our place in the natural world and uses our intelligence to create a better future for all **Global Environment** K.
