Canada Donald J. Savoie, 2023-05-15 Canada's political structure runs contrary to North America's economic geography and the north south economic pull Canada imported political and administrative institutions designed for a unitary state and its political leaders have struggled to make them work since the country was founded Because of this many Canadians their communities and their regions view themselves as victims to a greater degree than groups in other Western democracies do Our federal government has shown a greater willingness to apologize for historical wrongs than other Western countries Canada also outperforms other nations in helping victims make the transition to full participants in the country's political and economic life Donald Savoie maintains that Canada continues to thrive despite the many shortcomings in its national political institutions and the tendency of Canadians to see themselves as victims and that our history and these shortcomings have taught us the art of compromise Canada's constitution and its political institutions amplify rather than attenuate victimization however they have also enabled Canadians to manage the issue better than other countries Canadians also recognize that the alternative to Canada is worse and this more than anything else continues to strengthen national unity Drawing on his extensive experience in academe and as an advisor to governments Savoie provides new insights into how Canada works for Canadians

**Advancing Earth Surface Representation via Enhanced Use of Earth Observations in Monitoring and Forecasting Applications** Gianpaolo Balsamo, Fatima Karbou, Vanessa M. Escobar, Benjamin Ruston, Susanne Mecklenburg, Matthias Drusch, Isabel F. Trigo, 2019-08-23 The representation of the Earth s surface in global monitoring and forecasting applications is moving towards capturing more of the relevant processes while maintaining elevated computational efficiency and therefore a moderate complexity These schemes are developed and continuously improved thanks to well instrumented field sites that can observe coupled processes occurring at the surface atmosphere interface e g forest grassland cropland areas and diverse climate zones Approaching global kilometer scale resolutions in situ observations alone cannot fulfil the modelling needs and the use of satellite observation becomes essential to guide modelling innovation and to calibrate and validate new

parameterization schemes that can support data assimilation applications In this book we review some of the recent contributions highlighting how satellite data are used to inform Earth surface model development vegetation state and seasonality soil moisture conditions surface temperature and turbulent fluxes land use change detection agricultural indicators and irrigation when moving towards global km scale resolutions
