Northern ,2007-01-01 Thinking Northern offers new approaches to the processes of identity formation which are taking place in the diverse fields of cultural economic and social activity in contemporary Britain The essays collected in this volume discuss the changing physiognomy of Northern England and provide a mosaic of recent thought and new critical thinking about the textures of regional identity in Britain Looking at the historical origin of Northern identities and at current attitudes to them the book explores the way received mental images about the North are re deployed and re contained in the ever changing socio cultural set up of society in Northern England The contributors address representation of Northernness in such diverse fields as the music scene multicultural spaces the heritage industries new architecture the arts literature and film

Creativity Without Law Kate Darling,Aaron Perzanowski,2017-02-28 Behind the scenes of the many artists and innovators flourishing beyond the bounds of intellectual property laws Intellectual property law or IP law is based on certain assumptions about creative behavior The case for regulation assumes that creators have a fundamental legal right to prevent copying and without this right they will under invest in new work But this premise fails to fully capture the reality of creative production It ignores the range of powerful non economic motivations that compel creativity and it overlooks the capacity of creative industries for self governance and innovative social and market responses to appropriation This book reveals the on the ground practices of a range of creators and innovators In doing so it challenges intellectual property orthodoxy by showing that incentives for creative production often exist in the absence of or in disregard for formal legal protections Instead these communities rely on evolving social norms and market responses sensitive to their particular cultural competitive and technological circumstances to ensure creative incentives From tattoo artists to medical researchers Nigerian filmmakers to roller derby players the communities illustrated in this book demonstrate that creativity can thrive without legal incentives and perhaps more strikingly that some creative communities prefer and thrive in environments defined by self regulation rather than legal rules Beyond their value as descriptions of specific industries and communities the accounts collected here help to ground debates over IP policy in the empirical realities of the creative process Their parallels and divergences also highlight the value of rules that are sensitive to the unique mix of conditions and motivations of particular industries and communities rather than the monoculture of uniform regulation of the current IP system

Londoners' Larder Annette Hope,2011-11-18 In a vivid panorama Londoner s Larder presents the food of a great city Annette Hope has used biography literature and social history to explore the city of Chaucer Shakespeare Pepys Johnson Dickens Wilde and Virginia Woolf and to show in lively detail what these writers and their contemporaries might have eaten where the food came from and how it was cooked She looks at problems of supply distribution nutrition cooking and health and hygiene as the city expanded and changed character and chronicles the effects of social economic and ethnic shifts since the end of the Second World War At the end of each chapter are recipes from the period written in modern usable form From the takeaway pasties baked by the Cook in The Canterbury Pilgrims to dinner at the Caf Royal from John Evelyn s recipes for

salads to Mrs Beeton from the introduction of coffee to the appearance of ration books this book charts the gastronomic life of London in scholarly and entertaining detail A discussion of the city as it is at the beginning of the twenty first century rounds off the picture a time when Middle Eastern and Oriental food is commonplace and much of the cuisine available in European restaurants is inspired by that on offer in popular holiday resorts and purely British food is difficult to find If London beguiles you literature seduces you and recipes fascinate you this pioneering book will intrigue and delight you

Nutritionism Gyorgy Scrinis, 2013-06-18 Popularized by Michael Pollan in his best selling *In Defense of Food* Gyorgy Scrinis s concept of nutritionism refers to the reductive understanding of nutrients as the key indicators of healthy food an approach that has dominated nutrition science dietary advice and food marketing Scrinis argues this ideology has narrowed and in some cases distorted our appreciation of food quality such that even highly processed foods may be perceived as healthful depending on their content of good or bad nutrients Investigating the butter versus margarine debate the battle between low fat low carb and other weight loss diets and the food industry s strategic promotion of nutritionally enhanced foods Scrinis reveals the scientific social and economic factors driving our modern

fascination with nutrition Scrinis develops an original framework and terminology for analyzing the characteristics and consequences of nutritionism since the late nineteenth century He begins with the era of quantification in which the idea of protective nutrients caloric reductionism and vitamins curative effects took shape He follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis s research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice
