The New Urban Sociology Michael T. Ryan, Ray Hutchison, Mark Gottdiener, 2018-05-04 Widely recognized as a groundbreaking text *The New Urban Sociology* is a broad and expert introduction to urban sociology that is both relevant and accessible to the student. A thought leader in the field, the book is organized around an integrated paradigm: the sociospatial perspective, which considers the role played by social factors such as race, class, gender, lifestyle, economics, culture, and politics on the development of metropolitan areas. With its unique perspective, concise history of urban life, clear summary of urban social theory, and attention to the impact of culture on urban development, this book gives students a cohesive conceptual framework for understanding cities and urban life. In this thoroughly revised 5th edition, authors Mark Gottdiener, Ray Hutchison, and Michael T. Ryan offer expanded discussions of created cultures, gentrification, and urban tourism, and have incorporated the most recent work in the field throughout the text. *The New Urban Sociology* is a necessity for all courses on the subject.

An Analysis of Jane Jacobs's The Death and Life of Great American Cities Martin Fuller, Ryan Moore, 2017-07-05 Despite having no formal training in urban planning Jane Jacobs deftly explores the strengths and weaknesses of policy arguments put forward by American urban planners in the era after World War II They believed that the efficient movement of cars was of more value in the development of US cities than the everyday lives of the people living there By carefully examining their relevance in her 1961 book *The Death and Life of Great American Cities* Jacobs dismantles these arguments by highlighting their shortsightedness She evaluates the information to hand and comes to a very different conclusion that urban planners ruin great cities because they don't understand that it is a city's social interaction that makes it great Proposals and policies that are drawn from planning theory do not consider the social dynamics of city life They are in thrall to futuristic fantasies of a modern way of living that bears no relation to reality or to the desires of real people living in real spaces Professionals lobby for separation and standardization splitting commercial residential industrial and cultural spaces But a truly visionary approach to urban planning should incorporate spaces with mixed uses together with short walkable blocks large concentrations of people and a mix of new and old buildings This creates true urban vitality
