Buchmann, 2023-03-07 For many of us the buzzing of a bee elicits panic But the next time you hear that low droning sound look closer the bee has navigated to this particular spot for a reason using a fascinating set of tools She may be using her sensitive olfactory organs which provide a 3D scent map of her surroundings She may be following visual landmarks or instructions relayed by a hive mate She may even be tracking electrostatic traces left on flowers by other bees What a Bee Knows Exploring the Thoughts Memories and Personalities of Bees invites us to follow bees mysterious paths and experience their alien world Although their brains are incredibly small just one million neurons compared to humans 100 billion bees have remarkable abilities to navigate learn communicate and remember In What a Bee Knows entomologist Stephen Buchmann explores a bee s way of seeing the world and introduces the scientists who make the journey possible We travel into the field and to the laboratories of noted bee biologists who have spent their careers digging into the questions most of us never thought to ask for example Do bees dream And if so why With each discovery Buchmann s insatiable curiosity and sense of wonder is infectious What a Bee Knows will challenge your idea

Joseph James Kinyoun Joseph K. Houts, Jr., 2021-11-02 In March 1900 Dr Joseph James Kinyoun a surgeon with the Marine Hospital Service and the founder of the Hygienic Laboratory which became the National Institutes of Health discovered bubonic plague in San Francisco. His finding led to an immediate outcry from the governor, local and state politicians and the city's commercial interests. In the hyper-sensationalized journalism of San Francisco's newspapers Kinyoun was ridiculed leading to death threats and a 50 000 bounty on his head. Eventually California's quarantine caused an enormous uproar. By the time a special federal commission produced a report initially withheld from the public leading to charges of a coverup that vindicated Kinyoun a deal had been brokered wherein the pioneering doctor was removed from his post. This book tells a timely story about yellow journalism, coverup, corruption, the struggle between science and politics and the consequences of blind denial of the truth.
