Quick Start Guide

ADN-3000L, ADN-10000L & ADN-10020L

Step 1 Power Up

COLLAR RECEIVER: Charge the collar 12-14 hours. Be sure to cover the charge jack with the gray plug when done.

HANDHELD TRANSMITTER: Insert two (2) alkaline batteries in the transmitter with the positive (+) side out. Attach antenna to transmitter (ADN-10000L and ADN-10020L).

Step 2 Match Components

Press test light across side contacts. Press the "C" button on transmitter. Red light will illuminate to show stimulation.

Remove receiver from charger. Collar light will flash a yellow or amber light. Within 30 seconds, press and hold the red "C" (continuous stimulation) button on transmitter. Collar light will pulsate red. The components are now matched and will work together.

ADN-10020 users: Match yellow dog collar to the Dog 1 stimulation button; then repeat process for black dog collar and Dog 2 stimulation button on transmitter.

Step 3 Adjust the Collar

Proper Fit: The collar fit should be snug, yet loose enough to allow one finger to fit between the strap and dog's neck. Fit is important because a loose collar may cause inconsistent performance. It's okay to trim any excess strap length.

Important: Never leave the collar on the dog for more than 12 hours per day.
