

- \widehat{AC} intercepts $\angle ACB$
- $\angle C$ subtends \widehat{AB}
- $\angle C$ subtends \widehat{AB}

An angle whose vertex is on a circle, and whose sides contain chords of a circle is called the **inscribed angle**.

Within the endpoints of a chord on and the on the sides of the inscribed angle, then the chord on and **subtends** the angle.

An **intercepted** arc is an arc that lies between two lines, rays or segments.

A polygon is an **inscribed polygon** when all its vertices lie on a circle. That circle is called the **circumscribed circle**.

circumscribed circle

Measure of an Inscribed Angle Theorem

The measure of an inscribed angle is one-half the measure of its intercepted arc.

$$m\angle ACB = \frac{1}{2}m\widehat{AB}$$

Inscribed Angles of a Circle Theorem

If two inscribed angles of a circle intercept the same arc, then the angles are congruent.

$$\angle ACB \cong \angle ADB$$

Inscribed Right Triangle Theorem

If a right triangle is inscribed in a circle, then the hypotenuse is the diameter of a circle. Conversely, if the inscribed triangle has a side that is the diameter of the circle, then the triangle is a right triangle, and the angle opposite to the diameter is 90° .

$m\angle ABC = 90^\circ$ if and only if AC is the diameter of the circle.

Inscribed Quadrilateral Theorem

A quadrilateral is inscribed in a circle if and only if its opposite angles are supplementary.

If $m\angle C + m\angle B = m\angle A + m\angle D = 180^\circ$ then ABCD lies on the circumscribed circle.

Example 1:

Find x & y if the quadrilateral is inscribed in the circle.

Solution 1:

Since the sum of angles in a triangle add up to 360° ,

$$\widehat{BC} + \widehat{AB} + \widehat{DC} + \widehat{AC} = 360^\circ$$

$$\widehat{BC} + 120 + 50 + 100 = 360 \Rightarrow 360$$

$$\widehat{BC} = 90$$

To find x , we need to use the measure of an inscribed angle theorem.

$$\widehat{BC} = \widehat{AB} = 90 + 50 = 140 = 140$$

$$m\angle ACD = \frac{1}{2}m\widehat{AB}$$

$$m\angle ACD = \frac{1}{2}(140)$$

$$x = 70.5$$

By Inscribed Quadrilateral Theorem,

$$x + y = 180$$

$$70.5 + y = 180$$

$$y = 109.5$$

Substitute $x = 70.5$ in both sides

Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Rose Mary Zbiek,Glendon W. Blume,M. Kathleen Heid,2018-01-01 The depth and breadth of a mathematics teacher s understanding of mathematics matter most as the teacher engages in the daily work of teaching One of the major challenges to teachers is to be ready to draw on the relevant mathematical ideas from different areas of the school curriculum and from their postsecondary mathematics experiences that can be helpful in explaining ideas to students making instructional decisions creating examples and engaging in other aspects of their daily work Being mathematically ready and confident requires teachers to engage in ongoing professional learning that helps them to connect mathematics to events like those they live on a daily basis The purpose of this volume is to provide teachers teacher educators and other facilitators of professional learning opportunities

with examples of authentic events and tools for discussing those events in professional learning settings The work shared in Facilitator s Guidebook for Use of Mathematics Situations in Professional Learning Guidebook resulted from a collaborative effort of school mathematics supervisors and university mathematics educators The collaborators joined their varied experiences as teachers coaches supervisors teacher educators and researchers to suggest ways to scaffold activities encourage discussion and instigate reflection with teacher participants of differing mathematics backgrounds and with varying teaching assignments Each guide has ideas for engaging and furthering mathematical thought across a range of facilitator and participant mathematics backgrounds and draws on the collaborators uses of the Situations with in service and prospective teachers The events and mathematical ideas connected to each event come from Situations in Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations A Situation is a description of a classroom related event and the mathematics related to it For each of six Situations school and university collaborators developed a facilitator s guide that presents ideas and options for engaging teachers with the event and the mathematical ideas The Guidebook also contains suggestions for how teachers and others might develop new Situations based on events from their own classrooms as a form of professional learning Both teacher educators and school based facilitators can use this volume to structure sessions and inspire ideas for professional learning activities that are rooted in the daily work of mathematics teachers and students
