Psychology is one of the most popular majors in college today, with the number of students enrolled in the discipline having surged some 200% in the last 10 years. In this book, dozens of outstanding practitioners and scholars explain how quickly the career opportunities for graduates with psychology degrees are growing in talk therapy and clinical research, but also at agencies ranging from the CIA and Homeland Security to the Library of Congress and the Securities and Exchange Commission. In preparing his book, Oster contacted dozens of working psychologists and asked them what advice they would offer today's aspiring psychologists. Their responses provide a glimpse into a changing and ever expanding field. Dozens of contributors recall their thoughts and actions as they plotted careers or landed jobs by surprise. From one psychologist who put her research aside to become president of a university to another who ended his work with children to become an author of psychological mystery books, the dozens of practitioners interviewed share the sometimes humorous, often difficult experiences and decisions they faced as they completed their college years and built successful careers. The book includes advice on making the right choice from among psychology careers in fields old and new, the ins and outs of graduate school, and the lessons seasoned professionals learned in their quests for meaningful careers.
