Inspiring Teaching Preparing Teachers To Succeed In Mission Driven Schools:

Inspiring Teaching Sharon Feiman-Nemser, Eran Tamir, Karen Hammerness, 2014 The one size fits all model of traditional teacher education programmes has been widely criticized yet the most popular alternative fast track programs have at best a mixed record of success There is a third option grow your own teacher preparation programmes tailored to specific school contexts and the needs of the populations they serve In *Inspiring Teaching* Sharon Feiman Nemser and her colleagues investigate this context specific approach to teacher education

Teaching Teachers James W. Fraser, Lauren Lefty, 2018-10-01 Teacher education in America has changed dramatically in the past thirty years with major implications for how our kids are taught As recently as 1990 if a person wanted to become a public school teacher in the United States he or she needed to attend an accredited university education program Less than three decades later the variety of routes into teaching is staggering In *Teaching Teachers* education historians James W Fraser and Lauren Lefty look at these alternative programs through the lens of the past Fraser and Lefty explain how beginning in 1986 an extraordinary range of new teaching programs emerged most of which moved teacher education out of universities In some school districts and charter schools superintendents started their own teacher preparation programs sometimes in conjunction with universities sometimes not Other teacher educators designed blended programs creating collaboration between university teacher education programs and other parts of the university linking with school districts and independent providers and creating a range of novel options Fraser and Lefty argue that three factors help explain this dramatic shift in how teachers are trained an ethos that market forces were the solution to social problems long term dissatisfaction with the inadequacies of university based teacher education and the frustration of school superintendents with teachers themselves who can seem both underprepared and too quick to challenge established policy Surveying which programs are effective and which are not this book also examines the impact of for profit teacher training in the classroom Casting light on the historical and social forces that led to the sea change in the ways American teachers are prepared *Teaching Teachers* is a substantial and unbiased history of a controversial topic

The Palgrave Handbook of Teacher Education Research Ian Menter, 2023-03-24 This handbook presents a timeless comprehensive and up to date resource covering major issues in the field of teacher education research In a global landscape where migration inequality climate change political upheavals and strife continue to be broadly manifest governments and scholars alike are increasingly considering what role education systems can play in achieving stability and managed sustainable economic development With growing awareness that the quality of education is very closely related to the quality of teachers and teaching teacher education has moved into a key position in international debate and discussion This volume brings together transnational perspectives to provide insight and evidence of current policy and practice in the field covering issues such as teacher supply preservice education continuing professional learning leadership development professionalism and identity comparative and policy studies as well as gender equity and social

justice Getting the Teachers We Need Sharon Feiman-Nemser, Miriam Ben-Peretz, 2017-05-24 Teacher education faces challenges that are immediate and demanding Adapting teacher education to the changing needs of educational systems is an imperative This book offers engaging thoughtful and sometimes provocative ways of engaging in the debate around what is and can be in teacher education This book responds to such things as the economic limitations associated with fast track routes to teacher certification while also considering challenges such as the introduction of technology teaching core instructional practices as well as the place and nature of teacher education in preparing teachers for an ever changing world
