

Exercise 4A

Solution 1:

(i) $3x + 5y = 7.5$

$$\Rightarrow 3x + 5y - 7.5 = 0$$

$$\Rightarrow 3x + 5y - \frac{15}{2} = 0$$

$$\Rightarrow 6x + 10y - 15 = 0$$

On comparing this equation with $ax + by + c = 0$, we obtain

$$a = 6, b = 10 \text{ and } c = -15$$

(ii) $2x - \frac{y}{5} + 6 = 0$

$$\Rightarrow 10x - y + 30 = 0$$

On comparing this equation with $ax + by + c = 0$, we obtain

$$a = 10, b = -1 \text{ and } c = 30$$

(iii) $3y - 2x = 6$

$$\Rightarrow -2x + 3y - 6 = 0$$

On comparing this equation with $ax + by + c = 0$, we obtain

$$a = -2, \quad b = 3 \text{ and } c = -6$$

(iv) $4x = 5y$

$$\Rightarrow 4x - 5y = 0$$

On comparing this equation with $ax + by + c = 0$, we obtain

$$a = 4, \quad b = -5 \text{ and } c = 0$$

(v) $\frac{x}{5} - \frac{y}{6} = 1$

$$\Rightarrow \frac{6x - 5y}{30} = 1$$

Almost Periodic Type Solutions Marko Kostić, 2025-03-03 Maybe for the first time in the existing literature we investigate here the almost periodic type solutions to the abstract Volterra difference equations depending on several variables We also investigate the generalized almost periodic type sequences and their applications in a rather detailed manner as well as many new important spaces of metrically generalized almost periodic type spaces of sequences and functions We essentially apply some results from the theory of C regularized solution operator families to the abstract Volterra integro differential difference equations contributing also to the theory of fractional calculus and fractional differential equations The theory of abstract Volterra integro differential equations and the theory of abstract Volterra difference equations are very attractive fields of research of many authors The almost periodic features and the asymptotically almost periodic features of solutions to the abstract Volterra differential difference equations in Banach spaces have been sought in many research articles published by now The main aim of this monograph is to continue the work collected in my monographs published with W de Gruyter recently by providing several new results about the existence and uniqueness of almost periodic type solutions to the abstract Volterra integro differential difference equations which could be solvable or unsolvable with respect to the highest derivative order We would like to particularly emphasize that this is probably the first research monograph devoted to the study of almost periodic type solutions to the abstract Volterra difference equations depending on several variables We also consider here many new important spaces of metrically generalized almost periodic type spaces of sequences and functions and their almost automorphic analogues It is also worth noting that this is probably the first research monograph which concerns the generalized almost periodic type sequences and their applications in a rather detailed manner for the first time in the existing literature we also present here some applications of results from the theory of C regularized solution operator families to the abstract Volterra difference equations Fractional calculus and discrete fractional calculus are rapidly growing fields of theoretical and applied

mathematics which are incredibly important in modeling of various real phenomena appearing in different fields like aerodynamics rheology interval valued systems chaotic systems with short memory and image encryption and discrete time recurrent neural networks Many important research results regarding the abstract fractional differential equations and the abstract fractional difference equations in Banach spaces have recently been obtained by a great number of authors from the whole world In this monograph we also contribute to the theories of discrete fractional calculus fractional differential difference equations and multi dimensional Laplace transform Although the monograph is far from being complete we have decided to quote almost eight hundred and fifty research articles which could be of some importance to the interested readers for further developments of the theory established here
