Innovative Business Management Using TRIZ Sunil Kumar V. Kaushik, 2018-01-02 TRIZ is the Russian acronym for theory of inventive problem solving The basic assumption behind this theory is someone somewhere has already solved your problem or a very similar problem and all we need to do is apply the same principle to the current problem and solve it similarly It guides you to think in a specific direction rather than getting lost The goal of this book is to use some of the simple TRIZ tools to help readers immediately solve problems innovate be creative think and discover the joy of experiencing the thinking process in new dimensions that you might not have previously It is specifically focused on helping nonengineering and management professionals to apply the concepts of TRIZ immediately and reap benefits Interspersed throughout the book are vignettes from the author's round the world bicycle tour on a budget of less than five U S dollars per day having conducted close to 50 workshops and training sessions and trained more than 1 000 professionals on TRIZ without any remuneration throughout 21 countries including Thailand Laos Vietnam China Kyrgyzstan Uzbekistan Turkmenistan Iran Turkey Georgia Armenia Greece Italy France Spain and Portugal Back on Track United States. Handbook of Pain and Aging David I. Mostofsky, Jacob Lomranz, 2013-11-11 From time to time professional journals and edited volumes devote some of their pages to considerations of pain and aging as they occur among the aged in different cultures and populations One starts from several reasonable assumptions among them that aging per se is not a disease process yet the risk and frequency of disease processes increase with ongoing years The physical body's functioning and ability to restore all forms of damage and insult slow down the immune system becomes compromised and the slow growing pathologies reach their critical mass in the later years The psychological body also becomes weaker with unfulfilled promises and expectations and with tragedies that visit individuals and families and the prospect that whatever worlds remain to be conquered will most certainly not be met with success in the rapidly passing days and years that can only culminate in death Despair and depression coupled with infirmity and sensory and or motor inefficiency aggravate both the threshold and the tolerance for discomfort and synergistically collaborate to perpetuate a vicious cycle in which the one may mask the other Although the clinician is armed with the latest advances in medicine and pharmacology significant improvement continues to elude her or him The geriatric specialist all

too familiar with such realities usually can offer little else than a hortative to learn to live with it but the powers and effectiveness of learning itself have declined
