SAFE SERVICE PRACTICES

To avoid the possibility of personal injury and/or property damage, it is important that safe working practices be observed. The following are examples, but without limitation, of such practices.

Before servicing or testing an appliance, remove power cord from electrical outlet, tag circuit breaker to OFF, or remove fuse. Never connect with the proper installation of any safety device (GFCI/AFCL). The standard color coding for safety ground wires is GREEN or GREEN with YELLOW STRIPES. Ground wires are not to be used to connect carrying conductors. It is extremely important that the service technician reestablish all safety grounds prior to completion of service. Failure to do so will create a potential safety hazard.

 - All safety mechanisms are correct and secure.
 - All electrical leads are properly checked and secured away from sharp edges, high temperature components, and moving parts.
 - All unconnected electrical terminals, connections, features, etc. are adequately secured away from all other parts and panels.
