Punishment and Control in Historical Perspective H.

Johnston,2008-10-24 Bringing together new research this book advances current theoretical understandings of punishment and control in society It provides a critical analysis of institutions punishment and the law and explores the delivery of punishment and experience of incarceration in Western societies from the early nineteenth century *Condemned to Die* Robert Johnson,2018-12-07 *Condemned to Die* is a book about life under sentence of death in American prisons The great majority of condemned prisoners are confined on death rows before they are executed Death rows typically feature solitary confinement a harsh regimen that is closely examined in this book Death rows that feature solitary confinement are most common in states that execute prisoners with regularity which is to say where there is a realistic threat that condemned prisoners will be put to death Less restrictive confinement conditions for condemned prisoners can be found in states where executions are rare Confinement conditions matter especially to prisoners but a central contention of this book is that no regimen of confinement under sentence of death offers its inmates a round of activity that might in any way prepare them for the ordeal they must face in the execution chamber when they are put to death In a basic and profound sense all condemned prisoners are warehoused for death in the shadow of the executioner Human warehousing seen most clearly on solitary confinement death rows violates every tenet of just punishment no legal or philosophical justification for capital punishment demands or even permits warehousing of prisoners under sentence of death The punishment is death There is neither a mandate nor a justification for harsh and dehumanizing confinement before the prisoner is put to death Yet warehousing for death of an empty and sometimes brutal nature is the universal fate of condemned prisoners The enormous suffering and injustice caused by this human warehousing rendered in the words of the prisoners themselves is the subject of this book

The Nations at War, August 1914 - August 1916 Willis John Abbot,1917 [Paradata and Transparency in Virtual Heritage](#) Anna Bentkowska-Kafel,Hugh Denard,2016-05-13 Computer Generated Images CGIs are widely used and accepted in the world of entertainment but the use of the very same visualization techniques in academic research in the Arts and Humanities remains controversial The techniques and conceptual perspectives on heritage visualization are a subject of an

ongoing interdisciplinary debate By demonstrating scholarly excellence and best technical practice in this area this volume is concerned with the challenge of providing intellectual transparency and accountability in visualization based historical research Addressing a range of cognitive and technological challenges the authors make a strong case for a wider recognition of three dimensional visualization as a constructive intellectual process and valid methodology for historical research and its communication Intellectual transparency of visualization based research the pervading theme of this volume is addressed from different perspectives reflecting the theory and practice of respective disciplines The contributors archaeologists cultural historians computer scientists and ICT practitioners emphasize the importance of reliable tools in particular documenting the process of interpretation of historical material and hypotheses that arise in the course of research The discussion of this issue refers to all aspects of the intellectual content of visualization and is centred around the concept of paradata Paradata document interpretative processes so that a degree of reliability of visualization outcomes can be understood The disadvantages of not providing this kind of intellectual transparency in the communication of historical content may result in visual products that only convey a small percentage of the knowledge that they embody thus making research findings not susceptible to peer review and rendering them closed to further discussion It is argued therefore that paradata should be recorded alongside more tangible outcomes of research preferably as an integral part of virtual models and sustained beyond the life span of the technology that underpins visualization *The Anron Chapter Tommy Bell*, 2022-11-29 In 1990 preteen Jason Harbour wants nothing more than to spend time with friends in a new video game or a rousing baseball match until a freak storm turns his tidy world upside down and back twelve thousand years Thrust into the turmoil of a prominent scientist's kidnapping will he be able to help against the evil Zaynar's plans for domination over both dinosaur and human kind Exotic and courageous new friends make it difficult to choose which world he truly wants **The Distinction of Human Being** Thomas Kruger Caplan, 2016-03-28 Perhaps we are never done with thought nor should be If this is indeed the case then Kant may have been right after all in supposing that folks will never lose interest in metaphysics in thought thinking thought But what of academics Where would we find these days a comprehensive treatment of pure reason of the epochs of its origins and accomplishments that is not just another collection of interpretations of source texts in translation This study introduces philosophy students and professionals to the logotectonic method of conception as developed by Heribert Boeder a pupil of Martin Heidegger which is broadly structuralist in its approach but endeavors to make evident how the principles of rationality governing the Occidental tradition of logos even those dictated by the animus of our post modern world of thought in opposition to it are in fact founded upon the nature of pure reason itself the intellect the discipline and the art of which can be understood as constituting a unique language containing a vocabulary of distinguished terms a syntax that determines their ratios and rules of inference with which these terms of principle insight and issue are built into trains of thought about thought every thought As a result the wisdom of the Muses Homer Hesiod

Solon of the Holy Spirit the Synoptic Narratives of Mark Luke and Matthew the Apostolic Letters of Paul the Gospel of John and of Humanity Rousseau Schiller Herderlin can be seen to have thrice articulated in their own terms a moving vision of our experience with the distinction of human being inspiring critical reflection to consider the as a destiny with regards to which even we as the thinkers the doers and the builders of today are still learning what it means to make a difference The Distinction of Human Being offers contemporary thinkers beginners as well as professionals a comprehensive reading of the origin and the tradition of metaphysics encompassing the life and times of pure reason as it unfolds across its theoretical practical and poetic endeavor the last of which suggests what a philological philosophy might entail and demand of a new generation of friends of wisdom About the Author Thomas Kruger Caplan born 1961 in Manhattan has lived for the past 30 years in Europe for the most part in Germany He studied literature theory in Paris philosophy in Osnabrück Germany with Heribert Boeder 4 December 2013 a pupil of Martin Heidegger attended experimental theater workshops at the Brunswick University of Fine Arts Germany and is currently teaching business English philosophy cultural history and rhetoric at the Ostfalia University of Applied Sciences Salzgitter Germany

Ancestral Mindset John Daniel, 2025-01-14 *Ancestral Mindset* by thought leader and human relations expert John Daniel offers deep insight into what motivates us and drives our actions and how we can use that information to better lead influence and collaborate at work and home If human evolutionary history were compressed into a single calendar year with our earliest ancestor arriving on January 1 our transition from hunter gatherers wouldn't occur until the end of December We were hunter gatherers for well over 90 percent of our collective history The key to understanding us is understanding the hunter gatherer neurocircuitry that crafted our human nature In *Ancestral Mindset* John Daniel traces the development of the human brain from the birth of our species and applies his insights to teach leadership and teamwork from an evolutionary neurological perspective Why is your fight or flight instinct on a hair trigger when the boss calls you in Why does receiving advice from a colleague induce a threat state Why does it feel so disproportionately risky to disagree with the team The answers to those questions lie in our collective past As a heart transplant recipient with decades of executive HR experience Daniel knows a thing or two about risk survival and human behavior from the operating room to the board room His unique personal story and voracious appetite for research have led to a text as potentially transformative as it is bursting with information If you are interested in upping your leadership game improving your relationships or just becoming more persuasive *Ancestral Mindset* will help you adapt from the brain down Access your inner hunter gatherer and transform your take on what motivates elevates and convinces It will make you a better leader a better employee and a better Homo sapiens to those around you

,1975 **Literary Communication as Dialogue** Roger D. Sell,2020-11-15 As traced by Roger D Sell literary communication is a process of community making As long as literary authors and those responding to them respect each other s human autonomy literature flourishes as an enjoyable though often challenging mode of interaction that is truly dialogical in spirit This gives rise to author respondent communities whose members represent existential commonalities blended together with historical differences These heterogeneous literary communities have a larger social significance in that they have long served as counterweights to the hegemonic tendencies of modernity and more recently to postmodernity s well intentioned but restrictive politics of identity In post postmodern times their ethos is increasingly one of pleasurable egalitarianism The despondent anti hedonism of the twentieth century intelligentsia can now seem rather dated Some of the papers selected for this volume develop Sell s ideas in mainly theoretical terms But most of them offer detailed criticism of particular anglophone writers ranging from Shakespeare Ben Jonson and other poets and dramatists of the early modern period through Wordsworth and Coleridge to Dickens Pinter and Rushdie *Violent Death on a Strawberry Farm* Cyril James,2015-01-08 Three weeks after his birth Johnny America was abandoned by his biological mother who handed the infant Johnny to his parental grandmother at the funeral of his father who had passed away She then vanished into thin air There is no substitute to a mothers love not even for the street smart Johnny He was to face a tough life of poverty with love and affection being rare commodities The substitute mothering he received from his grandmother although loving and godly was inadequate It caused long term damage to his self esteem his ability to relate to other people and overall feelings of security and ability to trust others This emotional turmoil condemned Johnny to the streets of Cape Town and to live as an unpopular Bergie on the inhospitable slopes of Table Mountain where he was constantly harassed by the clean up squad He adopted his street family and together they engaged in petty theft prostitution and alcohol abuse resulting in Johnny serving time in the notorious Pollsmoor Prison While serving one of his many prison sentences Johnnys friend was killed violently in the strawberry fields where they were employed as convict labour by correctional services A notorious ex prison gang member is convicted for the crime for which Johnny is a state witness Johnny is scared for his life His quest to find his mother takes him
