Dr. Nirlep Kaur Deol, *Anatomy and Physiology* offers a clear and comprehensive exploration of the human body blending scientific accuracy with accessible presentation. Structured into three well-defined units, the book begins with the organization of the human body, introducing the fundamentals of anatomy and physiology, the structure and functions of cells, the diversity of tissues, and the skeletal framework, including joints and their roles in movement and support. The second unit delves into essential body systems, covering the muscular, digestive, and circulatory systems, along with an in-depth study of blood composition and function. The third unit continues with the respiratory, excretory, endocrine, and nervous systems, offering integrated insights into their structure, physiology, and interconnections. Ideal for students of health sciences, physical education, and allied fields, this book serves as both a foundational reference and a practical guide, fostering a deep understanding of the body's remarkable design and functions.
