Risk-Based Thinking Tony Muschara, 2017-11-13 Society at large tends to misunderstand what safety is all about It is not just the absence of harm When nothing bad happens over a period of time how do you know you are safe In reality safety is what you and your people do moment by moment day by day to protect assets from harm and to control the hazards inherent in your operations This is the purpose of risk based thinking the key element of the six building blocks of Human and Organizational Performance HOP Generally HOP provides a risk based approach to managing human performance in operations But specifically risk based thinking enables foresight and flexibility even when surprised to do what is necessary to protect assets from harm but also achieve mission success despite ongoing stresses or shocks to the operation Although you cannot prepare for every adverse scenario you can be ready for almost anything When risk based thinking is integrated into the DNA of an organization's way of doing business people will be ready for most unexpected situations Eventually safety becomes a core value not a priority to be negotiated with others depending on circumstances This book provides a coherent perspective on what executives and line managers within operational environments need to focus on to efficiently and effectively control learn and adapt Human Factors in the Nuclear Industry Anna-Maria Teperi, Nadezhda

Critical Steps Tony Muschara, Ron Farris, Jim Marinus, 2021-11-18 Critical Steps happen every day at work and at home purposefully Work does not happen otherwise If an operation has the capacity to do work then it has the capacity to do harm Work is energy directed by human beings to create value But people are imperfect we make mistakes and sometimes we lose control of the work Therefore work is the use of force under conditions of uncertainty A Critical Step is a human action that will trigger immediate irreversible and intolerable harm to an asset if that

action or a preceding action is performed improperly Whether the human action involves clicking on a link attached to an e mail message walking down a flight of stairs with a newborn baby in arms engaging the clutch on a gasoline driven chain saw or administering a medication to a patient in a hospital these all satisfy the definition of what constitutes critical risks in our daily lives professionally or personally The overarching goal of managing Critical Steps is to maximize the success safety reliability productivity quality profitability etc of people s performance in the workplace to create value for the organization without losing control of built in hazards necessary to create that value
