Teaching Academic ESL Writing Eli Hinkel, 2003-10-17 Teaching Academic ESL Writing Practical Techniques in Vocabulary and

Grammar fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing they must have the foundations of language in place: the language tools grammar and vocabulary they need to build a text. This text offers a compendium of techniques for teaching writing grammar and lexis to second language learners that will help teachers effectively target specific problem areas of students writing. Based on the findings of current research including a large scale study of close to 1 500 non native speakers essays this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second language teachers of writing and second language writers. Parts II and III include the key elements of classroom teaching: what to teach and why possible ways to teach the material in the classroom common errors found in student prose and ways to teach students to avoid them teaching activities and suggestions and questions for discussion in a teacher training course. Appendices to chapters provide supplementary word and phrase lists collocations sentence chunks and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post secondary EAP students and as a professional resource for teachers of students in EAP courses.

The Write Start with Readings Gayle Feng-Checkett, Lawrence Checkett, 2005. Clear and straightforward. The Write Start with Readings Paragraphs to Essays is a workbook designed to build writing revision and critical thinking skills by getting readers writing from the start. The text models the entire writing process from prewriting to proofreading with a model paragraph and extends the writing process model to writing the introductory body and conclusion paragraphs of an essay. It then continues instruction in the various modes of development teaching readers to write paragraphs and essays in each mode. Provides ample practice in applying the techniques and thinking skills. Also included are sample student and professional essays to encourage critical thinking and discussion. A Writer's Resource appendix provides opportunities for students to work on targeted skills in grammar punctuation and ESL concerns. For those interested in improving basic writing skills.
