Building Downtown Los Angeles Leland T. Saito, 2022-07-26 From the 1970s on Los Angeles was transformed into a center for entertainment consumption and commerce for the affluent Mirroring the urban development trend across the nation new construction led to the displacement of low income and working class racial minorities as city officials targeted these neighborhoods for demolition in order to spur economic growth and bring in affluent residents Responding to the displacement there emerged a coalition of unions community organizers and faith based groups advocating for policy change In Building Downtown Los Angeles Leland Saito traces these two parallel trends through specific construction projects and the backlash they provoked He uses these events to theorize the past and present processes of racial formation and the racialization of place drawing new insights on the relationships between race place and policy Saito brings to bear the importance of historical events on contemporary processes of gentrification and integrates the fluidity of racial categories into his analysis He explores these forces in action as buyers and entrepreneurs meet in the real estate marketplace carrying with them a fraught history of exclusion and vast disparities in wealth among racial groups

Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United States and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar

train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape Bulldozer Francesca Russello Ammon,2016-04-26 Although the decades following World War II stand out as an era of rapid growth and construction in the United States those years were equally significant for large scale destruction In order to clear space for new suburban tract housing an ambitious system of interstate highways and extensive urban renewal development wrecking companies demolished buildings while earthmoving contractors leveled land at an unprecedented pace and scale In this pioneering history Francesca Russello Ammon explores how postwar America came to equate this destruction with progress The bulldozer functioned as both the means and the metaphor for this work As the machine transformed from a wartime weapon into an instrument of postwar planning it helped realize a landscape altering culture of clearance In the hands of the military planners politicians engineers construction workers and even children s book authors the bulldozer became an American icon Yet social and environmental injustices emerged as clearance projects continued unabated This awareness spurred environmental preservationist and citizen participation efforts that have helped to slow though not entirely stop the momentum of the postwar bulldozer *The Handbook of Children, Media, and Development* Sandra L. Social Change Philip McMichael,2008 Fourth edition of this international bestseller Adopted by sociology politics development and also geography departments **Nature and the City** Gene Desfor,Roger Keil,2004-09 Pollution of air soil and waterways has become a primary concern of urban environmental policy making and over the past two decades there has emerged a new era of urban policy that links development with ecological issues based on the notion that both nature and the economy can be enhanced through technological changes to production and consumption systems This book takes a new look at this application of ecological modernization to contemporary urban political ecological struggles Considering policy processes around land use in urban watersheds and pollution of air and soil in two disparate North American global cities it criticizes the dominant belief in the power of markets and experts to regulate environments to everyone s benefit arguing instead that civil political action by local constituencies can influence the establishment of beneficial policies The book emphasizes subaltern environmental justice concerns as instrumental in shaping the policy process Looking back to the 1990s when ecological modernization began to emerge as a dominant approach to environmental policy and theory Desfor and Keil examine four case studies restoration of the Don River in Toronto cleanup of contaminated soil in Toronto regeneration of the Los Angeles River and air pollution reduction in Los Angeles In each case they show that local constituencies can develop political strategies that create alternatives to ecological modernization When environmental policies appear to have been produced through solely technical exercises they warn one must be suspicious about the

removal of contention from the process In the face of economic and environmental processes that have been increasingly influenced by neo liberalism and globalization Desfor and Keil s analysis posits that continuing modernization of industrial capitalist societies entails a measure of deliberate change to societal relationships with nature in cities Their book shows that environmental policies are about much more than green capitalism or the technical mastery of problems they are about how future urban generations live their lives with sustainability and justice **Race and Retail** Mia Bay,Ann Fabian,2015-08-04

Race has long shaped shopping experiences for many Americans Retail exchanges and establishments have made headlines as flashpoints for conflict not only between blacks and whites but also between whites Mexicans Asian Americans and a wide variety of other ethnic groups who have at times found themselves unwelcome at white owned businesses Race and Retail documents the extent to which retail establishments both past and present have often catered to specific ethnic and racial groups Using an interdisciplinary approach the original essays collected here explore selling and buying practices of nonwhite populations around the world and the barriers that shape these habits such as racial discrimination food deserts and gentrification The contributors highlight more contemporary issues by raising questions about how race informs business owners ideas about consumer demand resulting in substandard quality and higher prices for minorities than in predominantly white neighborhoods In a wide ranging exploration of the subject they also address revitalization and gentrification in South Korean and Latino neighborhoods in California Arab and Turkish coffeehouses and hookah lounges in South Paterson New Jersey and tourist capoeira consumption in Brazil Race and Retail illuminates the complex play of forces at work in racialized retail markets and the everyday impact of those forces on minority consumers The essays demonstrate how past practice remains in force in subtle and not so subtle ways **American Building Association News** ,1921
