Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments, Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

High School Mathematics at Work National Research Council, Mathematical Sciences Education Board, 1998-05-27. Traditionally, vocational mathematics and precollege mathematics have been separate in schools. But the technological world in which today's students will work and live calls for increasing connection between mathematics and its applications. Workplace-based mathematics may be good mathematics for everyone. *High School Mathematics at Work* illuminates the interplay between technical and academic mathematics. This collection of thought-provoking essays by mathematicians, educators, and other experts is enhanced with illustrative tasks from workplace and everyday contexts that suggest ways to strengthen high school mathematical education. This important book addresses how to make mathematical education of all students meaningful, how to meet the practical needs of students entering the workforce after high school as well as the needs of students going on to postsecondary education. The short, readable essays frame basic issues, provide background, and suggest alternatives to the traditional separation between technical and academic mathematics. They are accompanied by intriguing multipart problems that illustrate how deep mathematics functions in everyday settings, from analysis of ambulance response times to energy utilization from buying a used car to rounding off to simplify problems. The book addresses the role of standards in mathematics education, discussing issues such as finding common ground between science and mathematics education, standards improving the articulation from school to work, and comparing SAT results across settings. Experts discuss how to develop curricula so that students learn to solve problems they are likely to encounter in life while also providing them with approaches to unfamiliar problems. The book also addresses how teachers can help prepare students for postsecondary education. For teacher education, the book explores the changing nature of pedagogy and new approaches to teacher development. What kind of teaching will allow mathematics to be a guide

rather than a gatekeeper to many career paths Essays discuss pedagogical implication in problem centered teaching the role of complex mathematical tasks in teacher education and the idea of making open ended tasks and the student work they elicit central to professional discourse High School Mathematics at Work presents thoughtful views from experts It identifies rich possibilities for teaching mathematics and preparing students for the technological challenges of the future This book will inform and inspire teachers teacher educators curriculum developers and others involved in improving mathematics education and the capabilities of tomorrow s work force ENC Focus ,2001 ERIC Information Analysis Products Educational Resources Information Center (U.S.),1979 **Scientific and Technical Aerospace Reports** ,1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Catalog of Copyright Entries.
