Innovations in online teaching and learning Judah P. Makonye, Nokulunga S. Ndlovu, 2023-03-01 This book s research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face to face curriculum delivery during the COVID 19 pandemic The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching learning and assessment productively This book reports on case studies on teaching student

teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge. The scholars from South African universities used both conceptual and empirical methodologies mostly in qualitative set ups. The scholarly contributions in this book are varied. They cover theoretical nuances for ICT use in education, considerations for the use of computers in the classroom, pedagogical thinking and pedagogical integration of ICTs in education, affordances of iPads in visible teaching and learning, supporting student cognition in Languages, Mathematics, Science, Engineering, Graphics and Design with ICTs. The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others. The rich discussions that emerged from their research enable academics to learn from others' innovative moments that came as a result of pandemic pressure. The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change. The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education. Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time. How can the use of digital technology transform teaching and learning in general and teacher education in particular?
