Mathematics Grade 12 Paper 1 June 2012:

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 35 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Reign of Error Diane Ravitch, 2013-09-17 From one of the foremost authorities on education in the United States former U S assistant secretary of education whistle blower extraordinaire The Wall Street Journal author of the best selling The Death and Life of the Great American School System Important and riveting Library Journal The Language Police Impassioned Fiercely argued Every bit as alarming as it is illuminating The New York Times and other notable books on education history and policy an incisive comprehensive look at today s American school system that argues against those who claim it is broken and beyond repair an impassioned but reasoned call to stop the privatization movement that is draining students and funding from our public schools In Reign of Error Diane Ravitch argues that the crisis in American education is not a crisis of academic achievement but a concerted effort to destroy public schools in this country She makes clear that contrary to the claims being made public school test scores and graduation rates are the highest they ve ever been and dropout rates are at their lowest point She argues that federal programs such as George W Bush s No Child Left Behind and Barack Obama s Race to the Top set unreasonable targets for American students punish schools and result in teachers being fired if their students underperform unfairly branding those educators as failures She warns that major foundations individual billionaires and Wall Street hedge fund managers are encouraging the privatization of public education some for idealistic reasons others for profit Many who work with equity funds are eyeing public education as an emerging market for investors Reign of Error begins where The Death and Life of the Great American School System left off providing a deeper argument against privatization and for public education and in a chapter by chapter breakdown putting forth a plan for what

can be done to preserve and improve it She makes clear what is right about U S education how policy makers are failing to address the root causes of educational failure and how we can fix it For Ravitch public school education is about knowledge about learning about developing character and about creating citizens for our society It s about helping to inspire independent thinkers not just honing job skills or preparing people for college Public school education is essential to our democracy and its aim since the founding of this country has been to educate citizens who will help carry democracy into the future

What Lies Ahead for America's Children and Their Schools Richard Sousa,2014-03-01 The coming decade holds immense potential for dramatic improvement in U S education and in the achievement of American children and in this volume members of the Hoover Institution s Koret Task Force on K 12 Education examine both the potential gains and the pitfalls that lie ahead informed by where U S education has been what changes have been made in recent years and what s still required for the comprehensive overhaul that this vital enterprise so urgently needs Looking backward is infinitely easier than predicting the future but planning for the future is necessary if anything is to change and by analyzing the recent past and present condition of American primary and secondary school education across a host of key topics task force members in this volume chart a bold course for the years ahead Optimistic about the opportunities at hand they identify essential and feasible reforms as well as the barriers that must be overcome if those changes are to occur They offer high quality scholarship and thoughtful prescriptions for productive policy alternatives
