In addition, Agusta has introduced the concept of "hoist lift" to be used for the determination of cable life, instead of the term "hoist cycle". The newly established retirement life is 1 500 accumulated hoist lifts or 4 years, whichever occurs first.</p> <p>Consistent with a new EASA policy to mandate new or reduced airworthiness limitations (including life limited parts) by AD, this Emergency AD requires the amendment of the approved aircraft maintenance programme to incorporate the new retirement life limit and the replacement of all affected hoist cable assemblies that have exceeded that limit. In addition, a replacement time has been established for hoist cable assemblies for which the accumulated number of "hoist cycles" cannot be determined.</p> |                                                             |
