Dermal Absorption and Decontamination Aileen M. Feschuk, Rebecca M. Law, Howard I. Maibach, 2022-10-05 This book is a comprehensive volume dedicated to dermal absorption and decontamination. Given risks including chemical warfare and accidents with toxic industrial chemicals, studies involving dermal absorption and decontamination are of the utmost importance. Each chapter consists of a systematic review on an important dermal absorption and/or decontamination topic. Chapters address key issues such as the general acceptance of water soap and water as the gold standard of dermal decontamination despite the fact that it commonly provides incomplete decontamination and may even result in a wash-in effect, an increased penetration of contaminant. Decontamination with other substances, e.g. RSDL, is explored and factors that affect dermal penetration, e.g. anatomical variation, are summarized. All systematic reviews are comprehensive and up to date. *Dermal Absorption and Decontamination* will be useful for many fields and disciplines. Firstly, information on dermal decontamination may be used by governments for military and national defense purposes in the event of chemical warfare. Additionally, this information would be of use to many production companies whose employees are at risk of an accident with toxic industrial chemicals. Topics covered in the book will also be of use to pharmaceutical companies, especially those exploring transdermal delivery of drugs, and is of great relevance to those in the medical field, particularly dermatologists.

Laboratory Techniques in Cellular and Molecular Medicine Hajdúch, Marián, Drábek, Jiří, The methodological book *Laboratory techniques in cellular and molecular medicine* is intended for students of bachelor, master, and doctoral study programmes at faculties of science, medicine, and veterinary medicine, as well as for laboratory technicians interested in methodological approaches of contemporary cellular and molecular medicine. The book does not aim to provide a comprehensive overview of the current state of the art in cellular and molecular medicine, that would be a superhuman task. The aim of the 56-member author team is to provide readers with an overview of the methods established and tested at the Institute of Molecular and Translational Medicine of the Faculty of Medicine of Palacký University Olomouc, to describe the methodological principles and their practical application. It focuses both on basic methods whose principles are used by the most modern methods and on special methods reflecting the laboratory experience and specialisation of individual authors. The 52 chapters describe the work with cells and microorganisms, bioengineering manipulations of nucleic acids, the search for biomarkers, detection at the level of DNA, RNA, protein, organelle, and whole cell, and the use of fluorescent and radioactive labeling. To aid comprehension, the description of the methods is illustrated by figures and diagrams. Each chapter is followed by troubleshooting tips. The book promotes the best laboratory practice to increase the reproducibility of results in biomedicine.

Cerebral endothelial and glial cells are more than bricks in the Great Wall of the brain: insights into the way the blood-brain barrier actually works (Celebrating the centenary of Goldman's experiments) Elena García-Martín, George E. Barreto, José A. G. Agúndez, Rubem C. A. Guedes, Ramon Santos El-Bachá, 2015-07-02 When Ehrlich discovered the first evidence of the blood-brain barrier in 1885, he probably did not perceive the Great Wall that remained

hidden from consciousness inside the central nervous system Ehrlich had observed that acidic vital dyes did not stain the brain if they were injected into the blood stream A century ago 1913 Goldman showed that the injection of trypan blue in the cerebrospinal fluid stained only the brain but not the other organs For almost a century it was thought that the blood brain barrier BBB consisted in a physical barrier resulting from the restricted permeability of the cerebral endothelial cell layer as they are joined by tight junctions However as scientists are always looking for news in what is already discovered in the end of the 20th century we had evidences that cerebral endothelial and glial cells express several drug metabolizing enzymes consisting in a second protection system a metabolic barrier Furthermore the drugs and their metabolites must overcome the activity of several multidrug resistance proteins that function as ATP dependent efflux pumps consisting in the third line of defence the active barrier Therefore the way the BBB actually works should be better explained Several endogenous compounds as well as xenobiotics may be activated by enzymes of the metabolic barrier generating reactive oxygen species that could damage neurons Therefore endothelial and glial cells possess endogenous protecting compounds and enzymes against oxidants consisting in an antioxidant barrier When all these systems fail glial cells mainly microglia secrete cytokines in an attempt to crosstalk with defence cells asking for help which consists in an immune barrier In cerebral regions that are devoid of the physical barrier such as circumventricular organs the metabolic active antioxidant and immune barriers are reinforced It is important to understand how cells involved in the BBB interact with one another and the dynamic mechanisms of their functions This Research Topic published in this e Book considers recent highlights in BBB structure cell and molecular biology biotransformation physiology pathology pharmacology immunology and how these basic knowledges can be applied in drug discovery and clinical researches rewriting what is already written and paving the way that goes to the Great Wall in the Frontiers of the Brain in this new century that is just beginning *The Journal of Cell Biology*, 2007 No 2 pt 2 of November issue each year from v 19 1963 47 1970 and v 55 1972 contain the Abstracts of papers presented at the Annual Meeting of the American Society for Cell Biology 3d 1963 10th 1970 and 12th 1972
