

ECC Exam 1 Study Guide

1. 3 domains of development

- **Physical** (weight, motor skills, reproductive...)
- **Cognitive** (intellectual, e.g., attention, memory, language, problem solving)
- **Social & Emotional** (Often in combination with another domain, e.g., a cognitive language delay may cause a strain on the social and emotional domain)

2. 5 themes

- 1. How do **nature AND nurture** interact to affect development?
 - Nature is genetic characteristics
 - Nurture is environmental (e.g., parents, religion, area of living, school size, ...)
 - Findings are important for parents and teachers because they create the environment, and policy makers because they can create programs and determine if our tax dollars cover it (e.g., head start program)
 - **Epigenetics**: experience affects gene expression; study of how environment impacts the expression of genes (e.g., chaotic family environment may draw out mental illness)
- 2. How do children **shape their own development**?
 - Child's traits/characteristics
 - Child-initiated activities/preferences
 - Choice of friends, environments, and activities
- 3. How does the **social and cultural environment** affect one's **psychological** development?
 - *this is different from #1 because there is no mention or tie to genetics
 - Single parent home? Poverty? Ethnic backgrounds and customs?
- 4. Is development **continuous**? (resulting from small, gradual, steady, quantitative advances?) Or is it **discontinuous**? (resulting from abrupt, dramatic reorganizations of some qualitative change)
 - Only applies to cognitive domain because it is growing and changing linearly
 - Research shows development is continuous and able to be quantified
 - Discontinuous would be development in stages (think Piaget, or a caterpillar abruptly metamorphosing into a butterfly)
- 5. **Individual differences** in human development
 - There is no "normal" age for a child to do something for the first time
 - Environment may play a role
 - Long-term effects?
 - Walking? None
 - Toilet-training? None
 - Reading? Yes. Typically learned K-1

3. What makes the measurement of a variable **valid and reliable**?

- **Valid**: if the tool or test measures what it is supposed to measure (e.g., sociograms are a valid way to measure popularity)

These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Pape, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
