Objects of Empire Tamara L. Bray,2025-05-13 A comparative empire wide study of the ceramics associated with the imperial Inca state theorizing the role of these highly recognizable vessel forms in legitimizing Inca rule and establishing imperial identities The beautiful polychrome ceramics of the imperial Inca state have long been noted for their seemingly repetitive nature but little considered beyond this basic observation The widespread distribution and general uniformity of the Inca pottery however hints at its larger importance to the imperial project Moving beyond the pervasive seen one seen em all mentality Objects of Empire brings to light the variability and rich semiotic content of imperial Inca vessels Taking a comparative empire wide approach Tamara Bray identifies the parameters and significance of

this variability and defines the core elements of the imperial state style She then investigates where when and why differences and deviations from the perceived norm occur This study illuminates the strategies of territorial expansion and political control that lay at the heart of the Inca juggernaut as well as the role of objects in the calculus of would be rulers and subjects Based on a unique and extensive database of imperial Inca pottery developed through detailed study of archaeologically recovered and museum based collections Objects of Empire reveals how power and legitimacy were produced and reproduced under the Inca through the material culture of everyday life **Handbook to British Malaya**
