Dorthe Staunæs, Katja Brøgger, John Benedicto Krejsler, 2020-05-21 The purpose of this book is to investigate with conceptualization how reforms change educational organizations and subjectivities and how educational organizations change reforms The book gives an account of the power of conceptual endeavors with close readings of empirical material The book elaborates this through empirical investigations of the intertwinement of different educational reforms of policies standards and everyday educational lives across the globe As well as telling stories of reforms and how they transform and are transformed by the educational organizations and subjects they engage the book highlights how a careful enactment of methodologies and critiques might enable a tracing of not only intended but also unintended effects of reforms In this way the book explores performative approaches to education reform and thus attempts to nuance the idea of causality and linearity in the implementation of education reforms Engaging with performative approaches this book scrutinizes how reforms are involved with the creation and shaping of the world and thus offers insight into what happens when reforms are

Fried, Tommy Dreyfus, 2013-11-29 This book is the fruit of a symposium in honor of Ted Eisenberg concerning the growing divide between the mathematics community and the mathematics education community a divide that is clearly unhealthy for both The work confronts this disturbing gap by considering the nature of the relationship between mathematics education and mathematics and by examining areas of commonality as well as disagreement It seeks to provide insight into the mutual benefit both stand to gain by building bridges based on the natural bonds between them **Hollis Frampton** Michael Zryd, 2023-05-09 Hollis Frampton was an American filmmaker photographer and theorist who bridged the experimental film and contemporary art worlds in the 1960s and 1970s Best known for avant garde films including *Zorns Lemma* 1970 and *nostalgia* 1971 Frampton spent his later years working on the unfinished epic *Magellan* a monumental cycle that used the metaphor of Ferdinand Magellan's circumnavigation of the world to rethink the natures and meanings of history modernity and cinema Frampton's career was cut short by cancer at age 48 with his vast ambitions for the project left incomplete This book is a groundbreaking and comprehensive account of this

remarkable figure's work in its totality from Frampton's earliest films through Magellan Michael Zryd explores the connections linking Frampton's art and thought to other media forms histories and cultural frameworks He foregrounds Frampton's notion of the infinite cinema which redefined the parameters of the medium to encompass all forms of moving image and sound media across the past and future of cinematic possibility Zryd analyzes Frampton's ambivalent relationship with modernism and the Enlightenment showing how the artist navigated between attraction to radical artistic investigation and awareness of this tradition's implication in colonialism and other oppressive power structures Shedding new light on Frampton's project of exploring and critiquing how cinema attempts to capture and understand the world this book also considers his significance for contemporary art
