

CHAPTER 1

BACKGROUND OF THE STUDY

Artificial Intelligence (AI) is a popular technology that promises to revolutionize the way we work, play, and live. It has enabled us to quickly process large amounts of data and has changed our daily lives, our homes, and our interactions with others. AI is doing a lot of good and will continue to provide many benefits for our modern world, as AI could be used to end wars or eradicate diseases, however, AI can have negative consequences, such as create autonomous killing machines, increase unemployment or facilitate terrorist attacks. Legendary physicist Stephen Hawking shared this ominous warning: "Success in creating effective AI could be the biggest event in the history of our civilization. Or the worst. So, we cannot know if we will be infinitely helped by AI or ignored by it and sidelined, or conceivably destroyed by it." To prepare for the negative impacts of AI, we must consider what some of its negative impacts might be, which may become an imminent reality.

STATEMENT OF THE PROBLEM

The main goal of this research is to find out the negative impacts of Artificial Intelligence on the lives of Grade 11 TVL Information and Communication Technology of Mangaldan National High School.

Concretely, the objective of this study is to give answers the following questions:

1. What are the negative effects of Artificial Intelligence?
2. How does it affect the future of every TVL-ICT student?
3. What are the ways to prevent the misuse of Artificial Intelligence?

SCOPE AND DELIMITATION

AI is a debatable topic and is often represented in a negative way, some would call it a blessing in disguise for businesses, while for some it is a technology that endangers the mere existence of humankind as it is potentially capable of taking over and dominating human being, but in reality artificial intelligence has affected our lifestyle either directly or indirectly and shaping the future of tomorrow. AI has already become an intrinsic part of our daily life and has greatly impacted our lifestyle despite the imperative uses of digital assistants of mobile phones, driver-assistance systems, the bots, texts and speech translators, and systems that assist in recommending products and services and customized learning. The researcher will have 10 participants approximately out of 90 Grade 11 TVL-ICT students of MNHS.

CONCEPTUAL FRAMEWORK

Artificial Intelligence (AI) has become a part of our daily lives. Its propensity to affect human rights is getting more severe gradually. Some consequences of interference of AI with human rights have already been experienced. However, with rapid advancement of AI-technology, these consequential adverse impacts due to intersection of AI and human rights are apprehended to grow in severity as well as in dimension.
