Systematic Transformation Method from UML to Event-B Zou Sheng-Rong, Geng Xue, Yao Ju-Yi, Liu Xiao-Ying, Zhi Yu-Hua, 2024-06-05 Since the emergence of software engineering in the late 1960s requirements analysis has always been an important theme of software development In the process of software development many people are needed to cooperate to ensure the stability and reliability of the software According to the degree of formalization in the software development process software engineering methods can be divided into three types non formal semi formal and formal In object oriented software development UML has become a de facto modeling standard However although UML is intuitive and easy to understand and apply it has inaccurate semantics and UML is a semi formal modeling language that cannot be formally verified Event B is a formal method based on a large number of mathematical predicate logic which is accurate but difficult to understand and apply Therefore how to combine the advantages of UML diagrams and Event B methods is the focus of research

Discrete Event Modeling and Simulation Technologies Hessam S. Sarjoughian, Francois E. Cellier, 2013-03-09 The initial ideas behind this edited volume started in spring of 1998 some two years before the sixtieth birthday of Bernard P Zeigler The idea was to bring together distinguished researchers colleagues and former students of Professor Zeigler to present their latest findings at the AIS 2000 conference During the spring of 1999 the initial ideas evolved into creating a volume of articles surrounding seminal concepts pertaining to modeling and simulation as proposed developed and advocated by Professor Zeigler throughout his scientific career Also included would be articles describing progress covering related aspects of software engineering and artificial intelligence As this volume is emphasizing concepts and ideas spawned by the work of Bernard P Zeigler it is most appropriate to offer a biographical sketch of his scientific life thus putting into a historical perspective the contributions presented in this volume as well as new research directions that may lie ahead Bernard P Zeigler was born March 5 1940 in Montreal Quebec Canada where he obtained his bachelor's degree in engineering physics in 1962 from McGill University Two years later having completed his MS degree in electrical engineering at the Massachusetts Institute of Technology he spent a year at the National Research Council in Ottawa Returning to academia he became a Ph D student in computer and communication sciences at the University of Michigan Ann Arbor
