Victorian Women and the Economies of Travel, Translation and Culture, 1830-1870 Judith

Johnston, 2016-02-24 Both travel and translation involve a type of journey one with literal and metaphorical dimensions Judith Johnston brings together these two richly resonant modes of getting from here to there as she explores their impact on culture with respect to the work of Victorian women Using the metaphor of the published journey whether it involves actual travel or translation Johnston focusses particularly on the relationships of various British women with continental Europe At the same time she sheds light on the possibility of appropriation and British imperial enhancement that such contact produces Johnston's book is in part devoted to case studies of women such as Sarah Austin Mary Busk Anna Jameson Charlotte Guest Jane Sinnett and Mary Howitt who are representative of women travellers translators and journalists during a period when women became increasingly robust participants in the publishing industry Whether they wrote about their own travels or translated the foreign language texts of other writers Johnston shows women were establishing themselves as

actors in the broad business of culture In widening our understanding of the ways in which gender and modernity functioned in the early decades of the Victorian age Johnston s book makes a strong case for a greater appreciation of the contributions nineteenth century women made to what is termed the knowledge empire **Antipositivist Theories of the Sciences** N. Stockman,2013-03-09 The sciences are too important to be left exclusively to scientists and indeed they have not been The structure of scientific knowledge the role of the sciences in society the appropriate social contexts for the pursuit of scientific inquiry have long been matters for reflection and debate about the sciences carried on both within academe and outside it Even within the universities this reflection has not been the property of any single discipline Philosophy might have been first in the field but history and the social sciences have also entered the fray For the latter new problems came to the fore since reflection on the sciences is in the case of the social sciences necessarily also reflection on themselves as sciences Reflection on the natural sciences and self reflection by the social sciences came to be dominated in the 1960s by the term positivism At the time when this word had been invented the sciences were flourishing their social and material environment had become increasingly favourable to scientific progress and the sciences were pointing the way to an optimistic future In the later twentieth century however positivism came to be a word used more frequently by those less sure of nineteenth century certainties In both sociology and philosophy positivism was now something to be rejected and symbolizing the collapse of an earlier consensus it became itself the shibboleth of a new dissensus as different groups of reflective thinkers in rejecting positivism rejected something different and often rejected each other **Literary News** ,1884 *The Athenaeum* ,1907
