Family Function English Edition:

Family Functioning John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamental of human groups is currently perceived to be changing in response to social biological cultural and technological developments in our postmodern society While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal the authors of this volume consider them maladaptive Viewing society from the point of view of clinical psychiatry they point to greatly increased numbers of children born to single mothers soaring rates of divorce a statistically confirmed increase in mental disorders increase in reported incest high rates of depression in younger people and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration Perceiving a need to obtain information about family functioning that might lead to the increased stability and well being of this critically important type of system Dr John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature beginning with LePlay's study of 300 families in the 1850s and including important recent statistical studies They found that although these studies represent advances in understanding the family system some serious problems with the research remain one of which is confounding variables such as family function and mental or substance abuse disorders so that if a family member has a problem such as drug abuse the family is classified as dysfunctional

Osteosarcoma Takafumi Ueda, Akira Kawai, 2016-02-19 This book reviews the brilliant progress made in the past three decades in clinical outcomes for osteosarcoma patients treated with a multidisciplinary approach including limb salvage surgery combined with neoadjuvant multidrug chemotherapy and aggressive management of pulmonary metastasis Osteosarcoma was a miserable disease for adolescents and young adults until the early 1970s with a survival rate that was less than 10 15% even after amputation for affected limbs because of the progression of pulmonary metastasis With the development of neoadjuvant chemotherapy for osteosarcoma including high dose methotrexate doxorubicin cisplatin and ifosfamide during the late 1970s and the 1980s however the prognosis has dramatically improved Limb salvage surgery for patients with extremity osteosarcoma is now a gold standard surgical procedure for more than 90% of patients with localized disease Additionally aggressive pulmonary metastasectomy for patients with lung metastasis from osteosarcoma has contributed to improvement of their survival More recently carbon ion radiotherapy has also been introduced for patients with unresectable osteosarcoma of the trunk as in the spine and pelvis In this volume the author provides valuable descriptions of an important new treatment modality for a multidisciplinary approach for osteosarcoma patients

Korean American Families in Immigrant America Sumie Okazaki, Nancy Abelmann, 2018-10-09 An engaging ethnography of Korean American immigrant families navigating the United States Both scholarship and popular culture on Asian American immigrant families have long focused on intergenerational cultural conflict and stereotypes about tiger mothers and model minority students This book turns the tables on the conventional imagination of the Asian American immigrant family arguing that in fact families are often on the same page about the challenges and difficulties navigating the U S s racialized landscape The book draws on a survey with over 200 Korean American teens and over one hundred parents to provide context then focusing on the stories of five families with young adults in order to go in depth and shed light on today s dynamics in these families The book argues that Korean American immigrant parents and their children today are thinking in shifting ways about how each member of the family can best succeed in the U S Rather than being marked by a generational division of Korean vs American these families struggle to cope with an American society in which each of their lives are shaped by

racism discrimination and gender Thus the foremost goal in the minds of most parents is to prepare their children to succeed by instilling protective character traits The authors show that Asian American and particularly Korean American family life is constantly shifting as children and parents strive to accommodate each other even as they forge their own paths toward healthy and satisfying American lives This book contributes a rare ethnography of family life following them through the transition from teenagers into young adults to a field that has largely considered the immigrant and second generation in isolation from one another Combining qualitative and quantitative methods and focusing on both generations this book makes the case for delving more deeply into the ideas of immigrant parents and their teens about raising children and growing up in America ideas that defy easy classification as Korean or American

Clarkin, 2003-09-01 Marital and Family Therapy now in its Fourth Edition continues its tradition as a classic resource for psychiatrists and family therapists trainees and practitioners alike by combining psychiatric and integrative family models into a single framework The recent growth and changes in the field especially the movement away from narrowly based schools of therapy toward an integrative approach prompted the authors to expand and rewrite the text The authors have included the results of 20 years of successful field testing by trainees and have supplemented the text with well placed case vignettes and charts The authors have further renewed the appeal of this definitive text by 1 rewriting the discussion of how new attitudes and information about gender culture class and race are affecting family theory building 2 updating their text for compatibility with DSM IV TR and ICD 10 3 adding a section on treating Axis I disorders by combining family therapy with medication 4 adding a section on the new subspecialty of family systems medicine 5 offering the latest on family therapy effectiveness and training and 6 discussing afresh the ethical financial and professional issues facing therapists today With two new authors up to date references for the advanced therapist and suggested readings for both instructor and student this volume will spend little time on the shelf Psychiatrists family therapists social workers nurses family education teachers counselors family physicians and family law professionals will turn to this practical reference time and time again as they seek a better understanding of the evolving field of marital and family therapy
