Green,Katrina Skellern,2021-09-30 This Companion provides a review of global value chains GVCs and the megatrends that are shaping them and will continue to reshape them in deep set trajectories of change over the next few decades Megatrends herald both challenges and opportunities With the growing interest among business leaders and researchers in GVCs this is a reference work which fills a gap in current literature by focusing on the new features of GVCs including the shift of global purchasing power towards developing economies the significance of emerging technologies and data analytics the increasing tensions between globalisation and de globalisation and the role of micro multinationals start up entrepreneurs the public sector and middle markets in a fast changing global economy The early chapters are essentially intradisciplinary in character

with the first seeking to explore some historical aspects of GVCs Subsequent chapters cover the theory and practice of operations and supply chain management emerging supply chain technologies and the impact of inter firm collaboration across sectors and economies The final chapters take a more interdisciplinary approach and examine topics at the interface of GVCs with the economy society culture and politics This comprehensive handbook provides a timely analysis of leading edge global megatrends and practices in one volume *Spatiality* Vít Pászto, Carsten Jürgens, Polona Tominc, Jaroslav Burian, 2019-11-06 This open access book is based on Spatiality Spatial Exploration of Economic Data an interdisciplinary and international project in the frame of ERASMUS funded by the European Union The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics For the newly introduced courses interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries In a first study block students were taught methods from the two main research fields Afterwards the knowledge gained had to be applied in a project For this international project teams were formed consisting of one student from each university participating in the project The achieved results were presented in a summer school a few months later At this event more methodological knowledge was imparted to prepare students for a final simulation game about spatial and economic decision making In a broader sense the chapters will present the methodological background of the project give case studies and show how visualisation and the simulation game works *Milk in Spain and the History of Diet Change* Fernando Collantes, 2024-11-14 Praise for Milk in Spain and the History of Diet Change Unpacks the fascinating journey of Spain's relationship with dairy products Once a symbol of moving from poverty to prosperity fresh milk's appeal has dwindled as consumers favour plant based drinks and gourmet yogurts and cheeses Spain's late adoption and early shift out of fresh milk highlight a broader trend people often do not act in their own best interests This stimulating book examines the reasons behind these choices revealing the complex interplay between health commercial innovation culture and consumer behaviour A thought provoking exploration of how food choices reflect deeper societal shifts Avner Offer University of Oxford UK A triumph of food history This is an important book on changing food systems since 1950 While it focuses on Spain it has wider implications for dietary shifts and the food industry in Western Europe Milk is the product under consideration and Fernando Collantes cleverly teases out the main trends in supply and consumption using a combination of detailed empirical evidence and explanatory theoretical models The result is a satisfying mix of nutritional economic and socio cultural insights While it may seem obvious blanco y en botella leche I now realise that the story of milk is complex and this book should be read by anyone interested in the trends behind modern food history Peter Atkins Durham University UK In barely three generations the Spanish diet has changed beyond recognition The traditional concerns around nutritional health and scarcity have been mostly left behind but they have given way to new problems linked to excess In this book Fernando Collantes shows how the dairy industry has been central to this societal shift From widespread calcium deficiency in the 1950s to the more recent and

controversial turn to highly processed foods it provides a recent history of diet change in Spain Probing the reasons behind why this shift has occurred and how it shows that when it comes to food society politics economics and the law are intrinsically linked Taking the reader beyond the world of food Milk in Spain and the History of Diet Change combines qualitative and quantitative methods to position diet change within the broader debate on consumer society and the good life Contrasting two models of food consumption it shows that unless public policy takes the challenge of affluence seriously the food system can become an obstacle to a better society
