peculiar construction they are based on an explicit apples to oranges comparison of market prices with accounting fundamentals combining data derived from two very different sources and methodologies This creates ambiguities in interpretation that can complicate the application of these metrics for the many purposes Multiples are thus easy to construct but they can be difficult to interpret The meanings of certain multiples have evolved over time and new and improved versions have been introduced The field is becoming more complex and the question of which metrics perform best can be a source of controversy What You Will Learn Know the definitions interpretations and applications of all major market ratios including price earnings trailing and forward cyclically adjusted price earnings cash adjusted price earnings EV EBITDA price sales dividend yield and many more Examine the factors that drive the values of ratios from firm level such as earnings growth leverage and governance to market level such as inflation tax and fiscal policy monetary policy and international characteristics Apply metrics in investment analysis index construction factor models sum of the parts analysis of corporate structures and detection of asset bubbles Who This Book Is For Professionals at all levels working in the finance industry especially in fields related to investment management trading and investment banking who are involved with valuation and assessing and advising on corporate transactions and interpreting market trends and university students in finance related programs at the undergraduate and graduate levels

Program Evaluation for U.S. Army Lifelong Learning Centers (LLCs) Anna T. Cianciolo, 2008 Lifelong Learning Centers LLCs comprise a suite of technologies that enable online posting of schoolhouse curricula and collaboration among distributed learners These technologies connect the field Army to Army schoolhouses simultaneously improving course currency and supporting training in the field The impact of lifelong learning on organizational excellence seems clear However it is unknown how LLCs promote readiness using educational technology and how LLC effectiveness should be measured The purpose of this research was to develop a comprehensive generalizable framework for conceptualizing the effectiveness of LLCs and for capturing the drivers of success The framework and associated metrics were used to conduct an evaluation of a pilot LLC located at Fort Leavenworth This evaluation indicated the importance of taking a causal approach An assessment of outcomes alone would have indicated that the initiative had achieved its goals but would have obscured the fact that some of these goals teaching and learning effectiveness were achieved largely independently of the use of learning technologies The basis of the framework in theory makes it generalizable not only across current and future LLCs but also across other blended learning initiatives addressing a gap in the scholarly literature regarding the effectiveness assessment of educational technology
