Arroyo, 2013-07-25 Like Share Comment Subscribe Embed Upload Check in The commands of the modern online world relentlessly prompt participation and encourage collaboration connecting people in ways not possible even five years ago This connectedness no doubt influences college writing courses in both form and content creating possibilities for investigating new forms of writing and student participation In this innovative volume Sarah J Arroyo argues for a

participatory composition inspired by the culture of online video sharing and framed by theorist Gregory Ulmer's concept of electracy. Electracy according to Ulmer is to digital media what literacy is to alphabetic writing. Although electracy can be compared to digital literacy it is not something shut on and off with the power buttons on computers or mobile devices. Rather electracy encompasses the cultural, institutional, pedagogical and ideological implications inherent in the transition from a culture of print literacy to a culture saturated with electronic media regardless of the presence of actual machines. Arroyo explores the apparatus of electracy in many of its manifestations while focusing on the participatory practices found in online video culture particularly on YouTube. Chapters are devoted to questions of subjectivity, definition, authorship and pedagogy. Utilizing theory and incorporating practical examples from YouTube classrooms and other social sites, Arroyo presents accessible and practical approaches for writing instruction. Additionally, she outlines the concept of participatory composition by highlighting how it manifests in online video culture, offers student examples of engagement with the concept and advocates participatory approaches throughout the book. Arroyo presents accessible and practical possibilities for teaching and learning that will benefit scholars of rhetoric and composition, media studies and anyone interested in the cultural and instructional implications of the digital age.

*Hip-Hop Culture in College Students' Lives* Emery Petchauer, 2012-03-22. College campuses have become rich sites of hip hop culture and knowledge production. Despite the attention that campus personnel and researchers have paid to student life, the field of higher education has often misunderstood the ways that hip hop culture exists in college students' lives. Based upon in-depth interviews, observations of underground hip hop spaces and the author's own active roles in hip hop communities, this book provides a rich portrait of how college students who create hip hop, both male and female and of multiple ethnicities, embody its principles and aesthetics on campuses across the United States. The book looks beyond rap music, school curricula and urban adolescents to make the empirical argument that hip hop has a deep cultural logic, habits of mind and worldview components that students apply to teaching, learning and living on campus. *Hip Hop Culture in College Students' Lives* provides critical insights for researchers and campus personnel working with college students while pushing cultural observers to rethink the basic ways that people live hip hop.
