Clinical Guide to Mental Disability Evaluations Liza

Gold, Donna L. Vanderpool, 2013-01-11 Disability evaluations are the most common clinical mental health evaluations
conducted for nontreatment purposes They place mental health professionals in the role of communicating information that
is typically confidential to administrative and legal systems Unfortunately mental health professionals receive little to no
training in conducting assessments that focus on disability and disability management and often do not understand the
implications and risks of providing this information especially without conducting what are often specialized evaluations
Clinical Guide to Mental Health Disability Evaluations is geared for general mental health practitioners providing them with
the basic information needed to competently provide the various types of disability evaluations It also provides enough
information to inform forensic mental health providers in conducting more specialized evaluations [Comprehensive](#)
