**Human Geography in Action** Michael Kubly, John Harner, Patricia Gober, 2013-01-14 Michael Kubly's 6th edition of *Human Geography in Action* is comprised of 14 stimulating concept based chapters. The text aims to develop geographic problem solving skills that prove valuable to readers. Each chapter begins with an introduction to a concept followed by a case study tying the concept into the real world and wraps up with an activity. These engaging activities featured throughout the text further its Do Geography approach. *Human Geography in Action* provides the opportunity to use GIS to investigate ethnic distributions and culture regions, track the AIDS epidemic over space and time, model interstate migration flows, simulate India's demographic future, add new baseball franchises, animate past urban growth and assess future growth areas.

*Human Geography* Mark Boyle, 2014-09-04 Using the story of the West and the world as its backdrop, this book provides for beginning students a clear and concise introduction to Human Geography including its key concepts, seminal thinkers and their theories, contemporary debates and celebrated case studies. Introduces and applies the basic concepts of human geography in clear, concise and engaging prose. Explores the significance of the rise, reign and faltering of the West from around the fifteenth century in the shaping of the key demographic, environmental, social, economic, political and cultural processes active in the world today. Addresses important thinkers, debates and theories in an accessible manner with a focus on discerning the inherent Western bias in human geographical ideas. Incorporates case studies that explore human geographies which are being made in both Western and non-Western regions including Latin America, Africa and Asia. Is written so as to be accessible to students and contains chapter learning objectives, checklists of key ideas, chapter essay questions, zoom in boxes, guidance for further reading and a book glossary. Accompanied by a website at [www.wiley.com/go/boyle](http://www.wiley.com/go/boyle) featuring for students: tutorial exercises, bonus zoom in boxes, links to further learning resources and biographies of key thinkers; and for instructors: further essay questions, multiple choice exam questions and ppt lecture slides for each chapter.

**Social Work and the Environment** Michael Kim Zapf,2009 This ground breaking new work provides a detailed and extensive comparison of how the physical environment has been conceptualized in social work and other professions and offers a new and attractive foundational metaphor for social work The author acknowledges the need for greater awareness and action regarding environmental impacts and the book promotes more comprehensive notions of responsibility identity and stewardship that lead to a dynamic metaphor of people as place as the foundation for relevant social work practice in the early 21st century Why is that a profession with a declared focus on person in environment has been so silent on the environmental crisis Mainstream social work theory has narrowed the understanding of environment to include merely the social environment but this approach is no longer sufficient for participation in multi disciplinary efforts to tackle urgent environmental issues Transformative notions of responsibility identity and stewardship have been developed on the fringes of our professional community rural remote social workers Aboriginal social workers and international and spiritual social workers They must now move to the core of the profession

**Globalization Development and Social Justice** Ann El Khoury,2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies
